HHP-23

Please read instructions before using.

Applications

The HHP-23 will secure two (2) Harley-Davidson[®] Twin Cam, Evo or Sportster cylinder heads, without any modifications to the heads or the plate.

Instructions:

For ease of installation mount the plate on your machine first. There are two (2) locating dowels per head to align both heads exactly for precision machining. Then line up the desired cylinder heads with the holes in the head plate with the rocker box side down towards the plate. The combustion chamber should be facing upwards. Then secure the cylinder head to the plate through the holes according to the diagram on reverse side.

NOTE: The HHP-23 does not include the fastener bolts for any of the cylinder heads and must be supplied by the shop.

If you have any questions on the HHP-23 Harley Head Plate please contact Goodson Technical Support. 1-800-533-8010 or 507-452-1830 or visit us on the web: www.goodson.com

Fastener bolts for the cylinder heads and plate are not included.
