

THE CARBOXY GEL MASK

A MEDICAL GRADE CARBOXYTHERAPY TREATMENT FOR FACE, NECK, EYES AND BODY.
NO PAIN. NO DOWNTIME. JUST RESULTS.

AFTER JUST ONE USE, CO2LIFTPro:

- Increases Skin's Hydration > 117%
- Lifts and Tightens Skin
- Reduces Wrinkles and Lines
- Smoothes Skin Texture
- Reduces Pore Size
- Brightens Skin Tone
- Reduces Redness and Swelling

ABOUT CO2LIFTPro

CO2LIFTPro Carboxy Gel mask is an in-office and at-home treatment that acts as an "IV for the skin" delivering a rush of carbon dioxide to the application site. Treatment time is approximately 35 minutes to an hour. For best results, perform in a series of 3 then maintain results with monthly treatments.

HOW IT WORKS

Carboxytherapy is the use of carbon dioxide (CO2) to regenerate the skin. By infusing carbon dioxide into the skin, the body will respond by rushing oxygen rich blood to the tissue leading to an induction of new collagen and healthier skin.

CO2LIFTPro BENEFITS

The benefits of the CO2LiftPro Carboxy Gel are very similar to using the energy from laser. Lasers use controlled heat to damage the skin that will result in oxygen rich blood going to the area to repair the tissue.

CO2LIFTPro Carboxy Gel does the same thing, all without damage to the tissue. CO2LIFTPro utilizes the Bohr Principle. Carbon dioxide, when delivered into the tissue, forces the body to rush oxygen rich blood to the area also. This will regenerate the area without pain nor downtime!

HOW TO USE AND RECOMMEND CO2LIFTPro

- **IN A SERIES** CO2LIFTPro is recommended to be performed in a series of 3. When used for post-procedure care it is best performed every other day during the healing window. Once results are achieved, maintain with monthly treatments.
- **AS A STAND ALONE TREATMENT** For best results, perform one treatment every 5 to 7 days for at least 3 times. Maintain with monthly treatments.
- **IN COMBINATION TREATMENTS** CO2LIFTPro is proven to increase micro-circulation, speed up healing and increase hydration in the skin. Therefore, CO2LIFTPro Carboxy Gel is ideal for post care after lasers, chemical peels, microneedling and other types of invasive procedures. Consider it your "extended warranty" after a procedure!
