

CASE STUDIES

Fairway Market, Langford BC: Stormwater Detention System

The Challenge

This client had a short time frame to quickly get the tank installed. From request to installation, they needed the project completed in just a few weeks.

The Solution

We were able to quickly provide EcoBloc components to the site as we had them in-stock on our site. We communicated efficiently with the developer and engineer to coordinate a quick plan of action for the client and get the installation done quickly.

Project Team

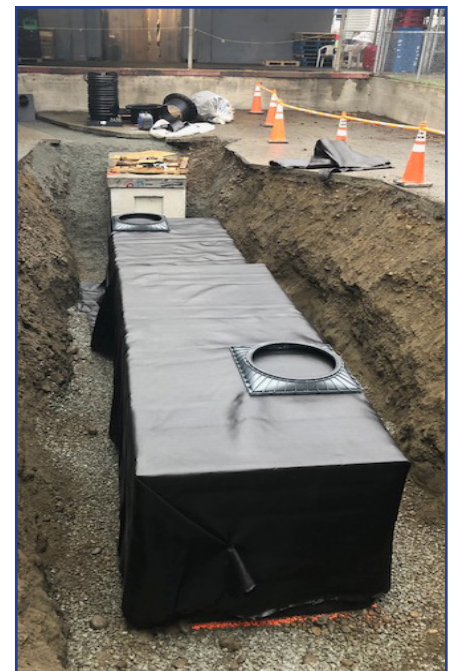

Supplier: BARR Plastics
Developer: Iconix Waterworks
Engineer: MSR Solutions Inc

Specifications

Volume: 20 m³
Application: Infiltration

BARR Product

Graf EcoBloc Inspect Flex
