VG-2 Audio/Visual Alerts

The VG-2 Audio/Visual Alerts will be turned on the feature on before it will detect VG-2.

When a VG-2 signal is detected, the detector "notes" its presence and will beep. The VG-2 signal must be undetectable by the VG-2. Every 30 seconds, the detector will display your speed and an alert if you are over 65 mph. The VG-2 alert is not sensitivity adjustable for this condition. During a VG-2 Alert, K and X band signals cannot be detected.

ALERT PRIORITY

When two or more alerts are received at the same time, the alert priority is:

1. VG-2

2. VG-2

3. 4 Safety Warning System Example:

When the VG-2 system is turned on, suddenly you will be detected by the 3-second audio and display the short display.

If you are detected by a VG-2, after the 3-second pulse alert, the standard alert pattern continues for as long as the signal is present. It is important to respond promptly to a pulse alert, since warning time may be minimal.

RESET FEATURES

After a VG-2 signal is detected, the detector will display a pulse warning and the standard alert pattern continues for as long as the signal is present. It is important to respond promptly to a pulse alert, since warning time may be minimal.

ARTIFICIAL INTELLIGENCE

When two or more alerts are received at the same time, the alert priority is:

1. VG-2

2. VG-2

3. 4 Safety Warning System

Example:

When the VG-2 system is turned on, suddenly you will be detected by the 3-second audio and display the short display.

If you are detected by a VG-2, after the 3-second pulse alert, the standard alert pattern continues for as long as the signal is present. It is important to respond promptly to a pulse alert, since warning time may be minimal.

Dear Whistler Customer,

Thank you for purchasing your Whistler detector. To get the most enjoyment out of your Whistler detector, we recommend reading and understanding the operation of your detector before using them. This operation guide will acquaint you with the operation of this Whistler product.

To fully acquaint yourself with the operation of your Whistler® and to better understand the features, we recommend reading this entire manual available on our website www.whistlergroup.com

To save time and effort, you do not have to re-enter them.

Sincerely,

Enjoy your Whistler detector and please drive safely.

The Whistler Group, Inc.

### Feature Description

#### 1. Product Overview
- **Install**
- **Mounting Guide**
- **Windshield Tint & Fuse Replacement**
- **Dual Band Radar Protection**
- **Display Shows:**
  - an integrated optical waveguide
  - engages Dim/Dark modes.
  - reduces the annoyance of false alarms.
  - provides distinct visual alarms.
  - compact, high-efficiency Radar Antenna.
  - provides quick and easy installation.

#### 2. Product Features
- **FDSR/TFSR**
  - **FDSR = ON**
  - **FDSR = OFF (default)**
- **TFSR**
  - **TFSR = OFF (default)**
  - **TFSR = ON**
- **VOICE**
  - **VOICE N = OFF**
  - **VOICE EN (English, default)**
  - **VOICE IT**
- **Q**
  - **Q = OFF**
  - **Q = ON**
- **D**
  - **D = ON**
  - **D = OFF**
- **POP™**
  - **POP™ = OFF (default)**
  - **POP™ = ON**

#### 3. Operation
- **Power On/Off**
  - Power On: 1st press
  - Power Off: 2nd press
- **Teach/Tutorial Mode**
  - To change option select mode, you must first exit option select mode.
  - To change option select mode, you must first exit option select mode.

#### 4. Installation
- **Mounting Guide**
- **Windshield Tint & Fuse Replacement**
- **Dual Band Radar Protection**
- **Display Shows:**
  - an integrated optical waveguide
  - engages Dim/Dark modes.
  - reduces the annoyance of false alarms.
  - provides distinct visual alarms.
  - compact, high-efficiency Radar Antenna.

#### 5. Warranty Information
- **3 Year Warranty**
  - Covers parts and labor for 3 years
  - Excludes scratches, dents, scuffs, and normal wear

#### 6. Installation
- **Mounting Guide**
- **Windshield Tint & Fuse Replacement**
- **Dual Band Radar Protection**
- **Display Shows:**
  - an integrated optical waveguide
  - engages Dim/Dark modes.
  - reduces the annoyance of false alarms.
  - provides distinct visual alarms.

### OPERATIONS

#### Power On/Off
- Press the power button to turn the detector on/off.
- Power On: 1st press
- Power Off: 2nd press

#### Mounting Guide
- Place the detector in the windshield over the area provided in the instructions.
- Secure the detector with the two suction cups and rubber bumper.

#### Teach/Tutorial Mode
- To change option select mode, you must first exit option select mode.
- To change option select mode, you must first exit option select mode.

---

### OPERATIONS

#### Power On/Off
- Press and hold the City button for approximately 2 seconds.
- Release the button after the power on/off icon is displayed.

#### Mounting Guide
- Place the detector in the windshield over the area provided in the instructions.
- Secure the detector with the two suction cups and rubber bumper.

#### Teach/Tutorial Mode
- To change option select mode, you must first exit option select mode.
- To change option select mode, you must first exit option select mode.

---

### OPERATIONS

#### Power On/Off
- Press and hold the City button for approximately 2 seconds.
- Release the button after the power on/off icon is displayed.
- Display shows: **OFF**

#### Mounting Guide
- Place the detector in the windshield over the area provided in the instructions.
- Secure the detector with the two suction cups and rubber bumper.

#### Teach/Tutorial Mode
- To change option select mode, you must first exit option select mode.
- To change option select mode, you must first exit option select mode.

---

### OPERATIONS

#### Power On/Off
- Press and hold the City button for approximately 2 seconds.
- Release the button after the power on/off icon is displayed.
- Display shows: **OFF**

#### Mounting Guide
- Place the detector in the windshield over the area provided in the instructions.
- Secure the detector with the two suction cups and rubber bumper.

#### Teach/Tutorial Mode
- To change option select mode, you must first exit option select mode.
- To change option select mode, you must first exit option select mode.
