

TORONTO, ON, March 10, 2020 - Northern Green Canada Inc. ("NGC"), a privately-owned licensed producer under Canada's Cannabis Act, has been granted European Union Good Manufacturing Practices (EU GMP) certification from the German competent authority of Upper Bavaria. This certification allows NGC to provide medical quality cannabis to EU patients. Management believes NGC to be the first privately-owned licensed producer of cannabis to achieve this milestone.

"It is a privilege to serve the cannabis patients of the European Union. We are proud of our team for the steadfast commitment to Good Manufacturing Practices they continue to display in realizing this responsibility to quality," stated Lisa McCormack, NGC's President and CEO. "We will continue operations as a leading medical cannabis producer in Canada and now, with our EU GMP certification, we are prepared to serve the global market. Supply agreements are being finalized with top EU distributors and we are ready to begin to fulfill them."

Northern Green Canada Inc. is a federally licensed producer of medical cannabis, focused on providing cannabis medications for a better quality of life. We are an R&D- driven company committed to the health and well-being of our patients. Our experienced team of experts works from NGC's EU GMP-certified, 2500 m² (27000 square foot) indoor growing and processing facility with a 4275 m² (46000 square foot) expansion capability. We are expanding our extraction capacity to produce oils, and are working with respected partners on treatment based cannabis medications. NGC is partnered with key global players to create distribution networks for patients worldwide.
