

# PEACE OF MIND WITH AUTHORISED CHANNEL

## CHOOSE PETROLEUM LOGISTICS IN NZ

When it comes to oil products, there are differences in buying from an authorised dealer compared to a parallel importer (non-authorised source). On surface, one may think the quality is similar but behind this, the unspoken assurance are very important. Technical support, authenticity, traceability, storage and compliance comes without question when buying from an authorised source.

We know that unauthorised products can lead to unwanted incidents, which could be avoided if the product is purchased from an authorised source, with full traceability and reliability for a total peace of mind.
