Installation precautions

Before you drill or cut any holes, investigate your vehicle's layout very carefully. Take special care when you work near the gas tank, fuel lines, hydraulic lines and electrical wiring.

Never operate the amplifier when it is unmounted. Attach all audio system components securely within the amplifier to prevent damage, especially in an accident.

Do not mount this amplifier so that wire connections are unprotected. in a pinched condition, in contact with any metal surfaces in your vehicle, or likely to be damaged by nearby objects.

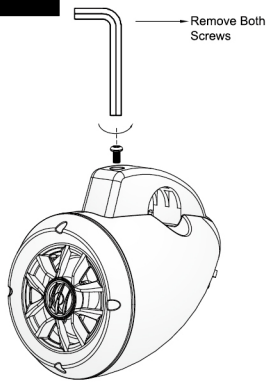
Before making or breaking power connections in your system, disconnect the vehicle battery. Confirm that your head unit or other equipment is turned off while connecting the input jacks and speaker terminals.

If you need to replace the power fuse, replace it only with a fuse identical to that supplied with the amplifier, Using a fuse of a different type or rating may result in damage to your audio system or your amplifier which is not covered by the manufactuer's warranty.

SPEAKER INSTALLATION INSTRUCTIONS:

Please note: The below instructions refers to most common bar sizes; 1.5″, 1.75″ and 2″
but using the supplied rubber pads will allow you to mount these speakers on any bar size measured between 1.5″ and 2″

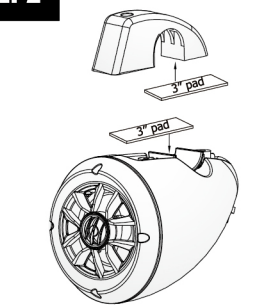
STEP1



YOU'LL NEED: H5 ALLEN WRENCH

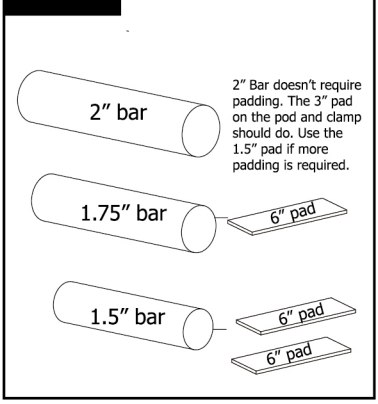
Remove the two screws from the bracket to separate the Speaker pod and the bracket.

STEP2



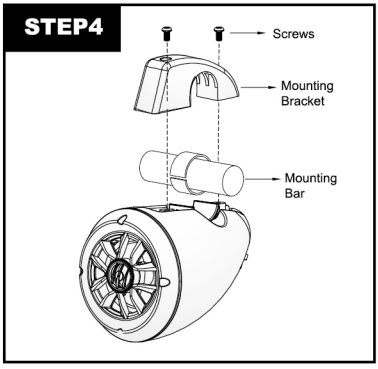
YOU'LL NEED: 3″ (76 mm) pads.
Remove the backing off the pad and place it in the inner side of both the pod and the mounting bracket.

STEP3



YOU'LL NEED: 6″ (150 mm) pads.
Remove the backing off the pad and wrap it around the bar.
* The pad should go all the way around the bar. if the pad is too long, cut the extra length.
** the glue on the pad is there only to make installation easier. Holding the speakers is not its purpose!

STEP4



Screw the clamp to the pod and you should be good to GO!!!

* Use the 1.5″ pad if more padding is required.
