

LFC 5000 Fluid Management System New Hardware

New hardware is now available for the LFC 5000 system. A new Dispense Unit, Combo Unit, and Combo Unit cables offer a new style connection that is more robust and with enhanced performance.

Major changes to our offering:

- New connector style with a positive lock for the connection between the DU, combo unit cable, and combo unit
- New cables with the addition of a 10 foot cable length
- Easier to use dipswitch for assigning the Dispense Unit and Keypad addresses
- New wireless adapter with support for 802.11n wireless standard in Dispense Units only

The new components are not backwards compatible with the old components. Thus you can not mix and match or replace an old component with a new one without using a crossover adapter. Below is a cross reference of the previous part numbers versus the new part numbers.

Previous Part Number	New Part Number	Description
500000	500000-A	Dispense Unit
500020	500020-A	Combo Unit
500006	500006-A	Combo Unit Cable pigtail
New item	276068-10	10' Combo Unit cable
500025	276068-25	25' Combo Unit cable
500050	276068-50	50' Combo Unit cable
500075	276068-75	75' Combo Unit cable
500100	276068-100	100' Combo Unit cable
500150	276068-150	150' Combo Unit cable
New item	278912	Union for connecting two Combo Unit cables together
New item	500081	Optional cover For Combo Unit connector port
500002	500002	802.11n Dispense Unit wireless adapter
New item	278911	Crossover cable to use a new DU with previous combo unit wiring such as the 500025
New Item	278910	Crossover cable to use a previous DU with new combo unit cable such as the 276068-25

We are also pleased to announce several new accessories to our product lineup.

- Install kit for combo units that includes (2) 90° elbows and (1) 1/2" x 24" connection hose
- Larger pulse meter sizes up to 3" in size
- A new stainless steel 1" pulse meter that has a higher pressure rating. Ideal for large lube trucks with gear pumps.
