

ONE UP

Matte Floor Finish

EXTENDS

One Up Extends Matte Floor Finish is a quick easy way to repair damaged surfaces that have scratches or abrasion to the wear layer. It is the perfect finish if you want to add a protective layer to your floor but not create a glossy floor that some may perceive as a slippery surface (gloss). It can be used on LVT or VCT tile floors.

Directions:

Before application of the Extends Matte Floor Finish make sure the floor is clean and free of all dirt and soils. For best results apply with a flat microfiber finish mop.

1. Apply Extends Matte Floor Finish in straight, even strokes that will cover fully, but not so liberally as to run into puddles. Apply 1 - 3 coats of One Up Matte Floor Finish to obtain the desired coverage.
2. Allow to dry completely. Do not re-work surface while it is drying. For best results keep traffic off floor for 20-30 minutes depending on temperature and humidity in the area being treated.

FUTURE CARE: Clean the flooring on a daily basis (depending on traffic) . Use One Up Extends Cleaner with a mop or autoscrubber. Maintaining a clean floor is very important to “extend” the life of the LVT or VCT floors wear layer.

Specifications:

Odor.....	Characteristic odor
Appearance.....	White liquid
pH.....	8.0 ± 0.5
Specific Gravity.....	1.014 +/- 0.5
Flash Point.....	None to boiling
