

# ONE UP

## Luxury Vinyl Tile Protector

# EXTENDS

One Up Extends LVT Protector is not just a watered down acrylic floor finish. One Up Extends LVT Protector is a dual charge polymer technology that harnesses the positive and negative charges of the molecule so it exhibits unmatched adhesion to the LVT surface.

The micro coating deposited enables additional protection to the wear layer and ease of cleaning. Use One Up Extends LVT Cleaner for general floor maintenance cleaning.

### Directions:

Before application of the Extends LVT Protector make sure the floor is clean and free of all dirt and soils. For best results apply with a flat microfiber finish mop. For small touch up areas Extends LVT Protector can be spray applied.

Place wet floor signs in area being treated. Do not dilute product.

1. Apply Extends LVT Protector in straight, even strokes that will cover fully, but not so liberally as to run into puddles

2. Allow to dry completely. Do not re-work surface while it is drying. For best results keep traffic off the floor for 20-30 minutes depending on temperature and humidity in the area being treated.

**FUTURE CARE:** Clean the LVT flooring on a daily basis (depending on traffic) . Use One Up Extends Cleaner with a mop or auto scrubber.

### Specifications:

Odor.....	Characteristic odor
Appearance.....	Clear liquid
pH.....	7.5 ± 0.5
Specific Gravity.....	1.013 +/- 0.5
Flash Point.....	None to boiling
Boiling Point.....	Appx. 212°F

### Features & Benefits
