Steps to be taken in case material is released or spilled: Avoid breathing vapors, remove ignition sources, and avoid skin contact.

Waste disposal method: Do not puncture or incinerate containers. Give full leaking containers to a disposal service equipped to handle and dispose of pressurized containers.

Precautions to be taken during handling and storage: Do not store where temperatures could exceed 54 C / 130 F.

Other precautions: Vapors are heavier than air and will remain flammable until vapor concentration is reduced below flammable limits.

SECTION EIGHT CONTROL MEASURES

Respiratory Protection: In well ventilated areas (below the TLV for the solvents) use a NIOSH/MSHA approved (TC-23C) respirator. When TLV are exceeded use a NIOSH/MSHA approved (TC-16C) respirator.

Protective Gloves: Chemical Resistant

Eye Protection: Splash Goggles

Ventilation: Local exhaust (hoods, fans, etc.) sufficient to maintain TLV.
Mechanical (general area ventilation) should be on while spraying, to remove solvent vapor.

Work or Hygienic Practices: Use good personal hygiene.

Other Protective Clothing or Equipment: Do not wear clothing soaked in spray.
