Section 1 - Product and Company Identification

Material Name • Black Jack Blacktop Crack Filler

Chemical Category • Mixture

Product Description • Asphalt emulsion driveway sealer.

Product Code • 6435-9-34

Product Use • Filler and sealant for asphalt pavements

Synonyms • Low VOC Water Based Asphalt Coating

Manufacturer • Gardner-Gibbon

4161 E. 7th Avenue
Tampa, FL 33605
United States

Telephone

Emergency • 800-424-9300 - CHEMTREC

Emergency • 703-527-3887 - CHEMTREC (Outside US)

Last Revision Date • 4/24/2015

Section 2 - Hazards Identification

Signal Word: WARNING!

Hazards and Precautions

Contains Petroleum Based Products. Use only with adequate ventilation. Avoid prolonged breathing of vapor or spray mist. Keep product closed and properly stored when not in use. Avoid contact with skin. Use protective gloves, safety glasses, and protective clothing when using this product. Do not use in drinking water or food systems. Do not reuse empty container. Make sure container is sealed and secured in an upright position during transportation. Do not eat or drink while using this product and wash hand thoroughly after use.

Prevention • Do not breathe dust, fume, gas, mist, vapors and/or spray. Do not handle until all safety precautions have been read and understood.

Response • IF exposed or if you feel unwell: Call a POISON CENTER or doctor/physician. See First-Aid section.

Physical Form • Liquid

Color • Black

Odor • Mild Hydrocarbon.

Flash Point • >460° F(238°C)
OSHA
- Skin Corrosion/Irritation - Category 2, Serious Eye Damage, Eye Irritation - Category 2A, Carcinogenicity - Category 1A

WHMIS
- Other Toxic Effects - D2A

GHS
- Skin Corrosion/Irritation - Category 2, Serious Eye Damage, Eye Irritation - Category 2A, Carcinogenicity - Category 1A

Potential Health Effects

Inhalation
Acute (Immediate) • May cause irritation of respiratory tract
Chronic (Delayed) • No data available

Skin
Acute (Immediate) • May cause irritation and redness of skin.
Chronic (Delayed) • Repeated and prolonged exposure may cause dermatitis.

Eye
Acute (Immediate) • May cause burning and redness or swelling of the eyes. May cause irritation.
Chronic (Delayed) • Repeated and prolonged exposure may cause irritation.

Ingestion
Acute (Immediate) • May be harmful or fatal if swallowed.
Chronic (Delayed) • No data available

Carcinogenic Effects • See Section 11 - Toxicological Information.

This product is an encapsulated mixture which reduces the likelihood of exposure to hazardous particulates. Airborne exposures to hazardous dusts or mists may be generated by spraying, sanding or grinding.
Section 4 - First Aid Measures

Inhalation  
- Remove to fresh air. Call a physician or poison control center. If not breathing, give artificial respiration.

Skin  
- Wash the contaminated area of body with soap and fresh water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.

Eye  
- Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first five minutes, then continue rinsing eye. If eye irritation persists: Get medical advice/attention.

Ingestion  
- Call a physician or poison control center immediately. Do not give anything by mouth to an unconscious person. Do NOT induce vomiting.

See Section 2 for Potential Health Effects.

Section 5 - Fire Fighting Measures

Extinguishing Media  
- Product is not expected to ignite because of water content. Use Dry Chemical (ABC) extinguisher or Carbon Dioxide if needed.

Firefighting Procedures  
- Keep unauthorized personnel away. Stay upwind. Fire fighters should wear complete protective clothing including self-contained breathing apparatus.

Unusual Fire and Explosion Hazards  
- Some of these materials may burn in the presence of fire, but none ignite readily. May release irritating or toxic gases, fumes, or vapors.

Hazardous Combustion Products  
- Carbon monoxide, carbon dioxide, hydrocarbons.

Protection of Firefighters  
- Wear positive pressure self-contained breathing apparatus (SCBA).

Flash Point  
- 460°F

Explosion Limits  
- No data available

Autoignition Temperature  
- No data available

Section 6 - Accidental Release Measures

Personal Precautions  
- Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate enclosed areas.

Emergency Procedures  
- Stop leak if you can do it without risk. Isolate the area and contain the spilled material. Persons not wearing the appropriate PPE should be removed from the area until the spill is cleaned up.

Environmental Precautions  
- Avoid run off to waterways and sewers. Do NOT wash away into sewer.

Containment/Clean-up Measures  
- Use appropriate Personal Protective Equipment (PPE) Contain and/or absorb spill with inert material (e.g. sand, vermiculite), then place in suitable container.

Prohibited Materials  
- Avoid contact with strong oxidizing agents and acids.

Section 7 - Handling and Storage

Handling  
- Keep containers tightly closed when not in use. Use only with adequate ventilation.

Storage  
- Keep only in the original container/package in a cool well-ventilated place. Keep away from fire. Keep container closed when not in use.

Special Packaging Materials  
- No data available

Incompatible Materials or Ignition Sources  
- Avoid contact with strong oxidizing agents and acids.
Section 8 - Exposure Controls/Personal Protection

Personal Protective Equipment

Pictograms

Respiratory • When used with adequate ventilation, a respirator is not normally required. If required, use a NIOSH-approved air purifying respirator with organic vapor cartridge or supplied air respirator. This product is an encapsulated mixture which reduces the likelihood of exposure to hazardous particulates. Airborne exposures to hazardous dusts or mists may be generated by spraying, sanding or grinding.

Eye/Face • Wear ANSI approved safety glasses with side shields or safety goggles.

Hands • Wear chemical protective gloves made of Nitrile or Neoprene.

Skin/Body • Wear clothing that covers the skin to prevent skin exposure.

General Industrial Hygiene Considerations • Avoid contact with skin, eyes or clothing. Do not eat, drink or smoke during work. Wash hands before eating.

Engineering Measures/Controls • Adequate ventilation systems as needed to control concentrations of airborne contaminants below applicable threshold limit values.

Section 10 - Stability and Reactivity
Stability
- Stable under normal temperatures and pressures.

Hazardous Polymerization
- Hazardous polymerization not indicated.

Conditions to Avoid
- Avoid contact with strong oxidizing agents and acids.

Incompatible Materials
- Strong oxidizers and acids.

Hazardous Decomposition Products
- Carbon monoxide, carbon dioxide and hydrocarbons.

Other Information
- No data.

Other Component Information
- IARC has concluded that the following chemicals in this product are carcinogenic to humans (Group 1): silica, quartz. ACGIH has designated the following chemicals in this product as suspected human carcinogens (A2): silica, quartz. NTP has listed the following chemicals in this product as known human carcinogens: silica, quartz. Risk of cancer depends on duration and level of exposure to this product as a dust or aerosol mist. Airborne exposure is not expected with this product. The materials are encapsulated and would only be release if the dry material was sanded. Exposure could increase if the product is sprayed.

Other Information
- This product contains petroleum asphalt. Petroleum asphalt is not listed as a carcinogen by OSHA or NTP. The National Institute of Occupational Safety and Health (NIOSH), has concluded that at higher temperatures roofing asphalt fumes are a potential occupational carcinogen. If this product is heated or comes in contact with heated material, avoid breathing fumes. This product may contain small amounts of polycyclic aromatic hydrocarbons (PAH’s) which are recognized carcinogens in humans and experimental animals. Mouse skin painting studies of roofing asphalt vapor concentrate have shown evidence of tumor formation associated with localized skin irritation in recent studies. Inhalation studies of high airborne concentrations of asphalt/bitumen fumes in rats and mice produced bronchitis, pneumonitis, and lung changes such as fibrosis and cell damage.

Section 12 - Ecological Information

Ecological Fate
- No data available.

Persistence/Degradability
- No data available.

Bioaccumulation Potential
- No data available.

Mobility in Soil
- No data available.

Section 13 - Disposal Considerations

Product
- Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.
Section 14 - Transportation Information

DOT - United States - Department of Transportation
Shipping Name: Not Restricted

TDG - Canada - Transport of Dangerous Goods
Shipping Name: Not Restricted

IMO/IMDG –International Maritime Transport
