

Instruction Manual: **Octopus**

Step 1 Screw in the 1" bushing into the 1" ball valve on the WaterMonster tank.

Step 2 Screw the 4-way splitter into the previously installed bushing.

*Notice the black valves are shown in the "ON" position. You can turn them off individually.

Step 3 Screw 4 hoses into the 4-way splitter. Position the hoses so they are facing down. You may need to retighten the 4-way splitter to keep it aligned straight. Open all 4 valves and the main tank valve. Push the dispenser buttons to test and flush the water.

Step 4 Screw the 2-way splitter into the hose bib on the WaterMonster tank

Step 5 Screw 2 hoses into the 2-way splitter. Position the hoses so they are facing down. You may need to retighten the 2-way splitter to keep it aligned straight. Open 2 valves on the splitter and the 1 valve on the hose bib. Push the dispensers buttons to test and flush the water.
