

Care & Maintenance Instructions: Ceramic

For all cleaners and sealers, **ALWAYS** test a small area first and follow manufacturer's instructions and limitations.

Ceramic is highly durable and requires minimal maintenance. Clean with a mild detergent or pH-neutral cleaner diluted in water, avoiding abrasive or acidic cleaners. Always test cleaners and sealers in a small area first. Elon recommends sealing all ceramic products before and after grouting. Follow these instructions to ensure your ceramic tiles maintain their best appearance.

Cleaning Ceramic

Use a pH-Neutral cleaner. When used regularly, it will prevent soap scum buildup and hard water deposits.

Example:

- *Aqua Mix® Concentrated Stone & Tile Cleaner*

Sealing Ceramic

Seal grout joints with grout sealer or impregnating or penetrating sealer, be sure to remove all sealer residue from surface of tile to prevent product hazing.

Examples:

- *Aqua Mix® Grout Sealer Spray*
- *Aqua Mix® Sealers Choice® Gold*
