

Care & Maintenance Instructions: Saltillo

For all cleaners and sealers, **ALWAYS** test a small area first and follow manufacturer's instructions and limitations.

Saltillo Terracotta products, known for their inherent porosity, can convey an enduring Old-World Charm when installed and maintained correctly, lasting for generations. Elon advises sealing all Terracotta Products both before and after grouting, using a high-quality low-sheen sealer. Re-application should follow the manufacturer's recommendations. It is crucial to use only pH-neutral cleaners specifically designed for Terracotta, avoiding abrasive or acidic alternatives. Promptly wiping up spills is recommended to prevent staining. Follow these instructions diligently to preserve the timeless beauty of your Saltillo tiles.

Cleaning Saltillo

Use a pH-Neutral cleaner. When used regularly, it will prevent soap scum buildup and hard water deposits.

Example:

- *Aqua Mix® Concentrated Stone & Tile Cleaner*

Sealing Saltillo

Contact professional floor care for Re-Sealing of Saltillo products.

- Always do a test area first.
