

SAFETY WARNING

PLEASE READ THIS FIRST

1. All Wall Mounted Shelf units have a rated load capacity of 600 pounds, evenly distributed, using 3" lag bolts anchored into solid wood studs or 3" concrete anchors into solid concrete supports capable of supporting such a load.
2. Each Wall Mounted Shelf utility hook can hold a maximum of 50lbs. Weight of utility hook storage must be included in the maximum load of 600lbs for the overhead rack.
3. Do not load more than 600lbs onto a Wall Mounted Shelf. Live loads (people, pets, etc.) may weigh less than the rated weight capacity, however will exert force on the rack beyond it's rated capacity. As such, do not stand, jump or hang from your Wall Mounted Shelf.
4. Wall Mounted Shelf units must be installed into structurally sound overhead/wall joists or supports. NewAge Products Inc. make no claim to the capacity or strength of the structure to which the units are mounted.
5. NewAge Products Inc. cannot be held liable for structure failure, or damage or injury resulting from structural failure.
6. Always inspect the structure of the ceiling and wall to ensure there are suitable supports.
7. The Wall Mounted Shelf is designed for installation into wooden joists/studs and solid concrete. Do not attempt mounting to steel beams.
8. Ensure all weight is distributed evenly on the rack. Place heavier objects near the perimeter frame and cross supports with lighter objects in the center.
9. Do not jump or climb on your Wall Mounted Shelf.
10. Do not lean a ladder against the Wall Mounted Shelf.
11. Routinely inspect your system to ensure all components are fastened correctly
