JUNE 2023

Grab our New Season Special • Product Range & Prices • Nitrosol Update • The Last Laugh

Oh My Goodness...The New Season is Here already!!!

You can certainly dispatch last season, never to be seen again. What a wild rollercoaster ride of unexpected weather events that hit both the North and South Islands. In essence the North Island was wet and the South Island was dry. We feel for families and their homes, orchards, wineries, farms, livelihoods and businesses destroyed by the devastation from the weather, and more so for the fact that many of these people have been forgotten in terms of local council and government assistance. Not only that but the payout has dropped bit by bit to the current expected payout of \$8.20 per kgMS. And the new seasons payout of \$8.00 per kgMS is challenging going forward.

I have had many customers ring and express their concerns about the large increase in farm costs right across the farm. At Agmax we have never experienced so many price rises in such a short time frame and the increases have been extraordinary. Of note Agmax has only had 4 price rises in 34 years and you can be assured that as soon as our suppliers prices come down, we will pass those benefits on to you, our customers. We have already done this with the price of Chlorhexidine.

And just to confirm, you will not see the bubbly and delightful Agmax team at Mystery Creek Fieldays. We have done 20 years of Mystery Creek, Dargaville, Central District, South Island at Lincoln and Waimumu. They provided a fantastic opportunity in the early days to meet our customers.

However as much as we would love to see you all again, it is not an effective business strategy for our direct to farm business. Furthermore, Agmax has special pricing the whole year, every year since we started 34 years ago! We are the lowest price for your detergents, teat sprays, emollients, and bloat

products. No middleman, we make it all and send it direct to your farm.

Here's to you all having some sort of break over the dry off period except for the winter milkers. Whether you get off farm or have a Staycation (I have never heard of the word Staycation till today) make sure you recharge your batteries so that you are pumped and ready to rock for the new season.

To help with your costs on farm make the most of our New Season special which is 10% off all our acid detergent orders with some combination deals and bonus product deals as well.

Please make sure your milk plant and vat are spotlessly clean and ready to go for a grade free start to the new season. You will not get your season off to a great start with a milk grade if you send less than 600 litres of milk on your first collection.

Another special is our Eprizero Drench nil milk withhold which is now \$579 including GST per 5ltr bottle, so make the most of this low price for when you are drenching your cattle.

Here's to a great new season and may the weather Gods provide us with a mild Winter and a sunny Spring, with just enough rain and heaps of sunshine, yeah right! But wait there's more, less than 94 days till the start of the Rugby world cup!

GO THE ALL BLACKS!!

Love life and stay well!

Start the season with a clean machine and Vat!

Protect Your Assets: The Milkline and Vat!

The biggest cause of start of season hygiene problems is poor cleaning at the end of the previous season. This is due to issues such as: soil left to harden in the machine during off-season, which happily collects fresh new soil, and in turn is the perfect breeding ground for bugs, as well as left-over colostrum from the previous season.

Best line of defence for a clean start to the new season?

1. Do a powerful bomb wash before your first milking.
2. Allow the machine to dry, then open/strip all components and inspect thoroughly.
3. Manually clean any parts that aren't perfectly clean, and replace any damaged rubberware.
4. Re-assemble the machine, rinse well and sanitise with hot or cold acid sanitiser.
5. Rinse well with cold potable water.
6. Drain plant. Don't forget to rinse the plant before the next use.

MACHINE CLEANING: Alkali sachets and Chlorine

How to do a bomb type wash using alkali sachets for your first wash of the season:

1. Do a big cold rinse using 20 litres of cold water per cluster. Drain the plant.
2. Bomb wash (super strong alkali wash). Use 10 litres of hot water per cluster and increase your usual alkali amount by 3-5 times.

3. Recirculate for 6-8 minutes and don't let the water temperature drop below 60°
4. Rinse with 10 litres of cold water per cluster and add 100mls of Agmax Maximum acid sanitiser or 150ml Agmax Works acid sanitiser per 100 litres of water.
5. Then rinse the plant with 10 litres of cold water per cluster.
6. Drain the plant.

Wait until the plant has time to dry and then inspect the milkline.

- Check to see if there are any patches on the upper surfaces (ceiling). If there are; use a torpedo brush dipped in vat cleaner to brush the milkline. Then brush a second time with a filter sock over the brush. If it comes out covered in yellow/orange gunk, you'll need to repeat the process. What you can see is protein and must be removed before your first milking.

VAT CLEANING

For the first vat wash of the season, we recommend you use Agmax Vat Cleaner which was purpose designed for this job:

- Pour up to 500mls or 150mls/100 litres of Vat Cleaner into the vat alkali wash. This product foams, and the foam clings to the vat, creating heaps of contact time and does the cleaning for you.
- Note: No scrubbing, no hot water necessary.

- Recirculate for 8-10 minutes.
- After 10 minutes, rinse off with plenty of plain cold water. Vat to be drained and residues minimized. That's it! Re-inspect when dry.

The start of season clean-up is vital to set you up for a grade free start to the new season.

New Season Specials 2023

Order in June for delivery in June, July or August 2023

10%
SAVINGS
\$114.20

ANIMAL HEALTH PRODUCTS

BLOATBUSTER

- Premium-grade alcohol ethoxylate
- Formulated for effective prevention and treatment of Bloat
- In-line dispenser and alkathene pipe friendly
- Cold water soluble, drench or trough use
- 4ml dose rate

ACVM No.A7621

20lt **\$227** • 100lt **\$968** • 200lt **\$1676** all incl GST
20lt \$197.39 • 100lt \$841.74 • 200lt \$1457.39 ex GST

MEGASTART

- High energy drench for cows post calving and when nutritionally stressed
- Unique powder formula that doesn't separate in storage
- Can be added dry to supplementary feed or diluted with water for drenching
- Just dilute with water and administer with drenching bottle. **See pictured >*
- **Not suitable for drenching guns**
- High energy from vegetable derived carbohydrate and bypass fat
- Good source of calcium + magnesium needed after calving
- Good source of Cobalt for vitamin B12 synthesis in rumen
- Supplied in convenient 16 kg (20 doses), re-sealable pail and measure; suitable for cows and sheep
- Dose rate: 800g per dose.

*Nutrient/energy per 800g dose: Energy 16.7MJ
Magnesium12g Calcium 70g Cobalt 2g*

16kg pail **\$185** incl GST • \$160.87 ex GST

***Note: Drench bottle not supplied.**

BLOATSTOP

- NEW technology blend of pluronics
- Very effective for treating stock with Bloat
- No pipe cracking
- In-line dispenser and alkathene pipe friendly
- Cold water soluble, drench or trough use
- 4ml dose rate

Please call on our free phone 0508 524 824 for further information.

GLYPHOSATE 360

Glyphosate is one of the most common non-selective herbicides for control of broadleaf weeds and many annual and perennial grasses.

- Contains 360g/l glyphosate herbicide as the isopropylamine salt
- Non-selective herbicide; ideal for spraying out pasture

ACVM No.P005441

5lt **\$76.59** • 20lt (4x5l) **\$211.60** • 200lt **\$1,794** all incl GST
5lt \$66.60 • 20lt \$184 • 200lt \$1,560 all ex GST

TRICLO

- Triclo is a selective herbicide and is grass friendly
- Controls blackberry, broom, gorse, lupin, tutus, fennel, sweet briar and old man's beard
Also effective against most broadleaf weeds in pasture
- Contains 600g/l triclopyr as the butoxyethyl ester

ACVM No.P007189

5lt **\$289.80** • 20lt (4x5l) **\$690** all inc GST
5lt \$252 • 20lt \$600 all ex GST

MSF 600

- The lowest cost gorse killer, both popular and proven in New Zealand
- MSF 600 herbicide is a water dispersible granule; easy to handle and dissolves fast
- MSF 600 herbicide controls gorse, bracken, manuka, blackberry, ragwort, thistles and many other broadleaf and brush weeds

ACVM No.P007027

200g **\$34.50** • 500g **\$46** • 1kg **\$89.70** • 2kg **\$149.50** all inc GST
200g \$30 • 500g \$40 • 1kg \$78 • 2kg \$130 all ex GST

GLYPHOSATE 540

- 540g/L glyphosate potassium salt as a soluble concentrate
- Non-selective herbicide; ideal for spraying out pasture
- Leaves no residue in the soil; sow new seed 48 hours after application
- No withholding period

5lt **\$113.85** • 20lt (4x5l) **\$315.10** • 200lt **\$2,599** all incl GST
5lt \$99 • 20lt \$274 • 200lt \$2,260 all ex GST

BUCKSHOT

Direct spot application for the control of scattered broadleaf weeds and brush weeds in pasture. Applied as a dry granule; no mixing or preparation is required so it's always ready to use.

- Contains 20g/kg picloram active ingredient
- Apply by hand, by pogo stick applicator, or by applicator bottle (including the ever-popular old detergent bottle, etc)
- Buckshot will not harm pasture grasses, but it does damage clover

ACVM No.P007717

5kg **\$179.40** • 20kg (4x5l) **\$515.20** all inc GST
5kg \$156 • 20kg \$448 all ex GST

SUPERWETTER

- Organosilicones provide optimum penetration into woody-stemmed species (gorse, black-berry, etc)
- Faster uptake by plant; reduces rain risk
- Boosts herbicide performance against harder-to-kill species, and when target plants are stressed or dusty

5lt **\$159.85** • 20lt (4x5l) **\$483** all inc GST
5lt \$139 • 20lt \$420 all ex GST

NOTE: ALL HERBICIDE ORDERS INCUR A FREIGHT CHARGE. CALL US FOR MORE INFORMATION.
Prices include GST. Prices are subject to change without notice.

GRANNY- GRANULAR GLYPHOSATE

- Water-soluble granules containing 800g/kg of active glyphosate herbicide
- Non-selective herbicide for spraying out pasture, plus general weed control
- The stronger, smarter and most economical glyphosate option

ACVM No.P007499

2.25kg **\$72.45** • 4.5kg **\$124.20** • 9kg (2x4.5kg) **\$207** all inc GST • 2.25kg \$63 • 4.5kg \$108 • 9kg \$180 all ex GST

GA200

GA200 controls a wide range of weeds, grasses and clovers, and is safe to use in orchards and vineyards.

- The Active ingredient is glufosinate-ammonium at 200g/litre in the form of a soluble liquid concentrate
- GA200 is a non-selective herbicide but with very limited systemic movement through the target plant

ACVM No.P009422

5lt **\$184** • 20lt (4x5l) **\$609.50** all incl GST
5lt \$160 • 20lt (4x5l) \$530 all ex GST

SPRAYWETTER

Spraywetter non-ionic surfactant, improves penetration, especially into harder and waxy plants. Effective for most broadleaf weeds.

- Cost-effective and great weedkiller wetting agent
- Faster plant uptake significantly reduces the rain risk period
- Aids in herbicides' penetration into a wide range of target weeds

5lt **\$90.85** • 20lt (4x5l) **\$264.50** all inc GST
5lt \$79 • 20lt \$230 all ex GST

GRASSMATE

This selective herbicide doesn't harm common pasture grasses and is a great way to control brush weeds and broadleaf weeds in pasture.

- Contains 300g/L triclopyr as the butoxyethyl ester plus 100g/l picloram as the amine salt in the form of an emulsifiable concentrate
- Controls Blackberry, Broom, Gorse, Lupin, Tutus, Sweet Briar, and Matagouri. Also controls broadleaf weeds

ACVM No.P007417

5lt **\$276** • 20lt (4x5l) **\$862.50** all inc GST
5lt \$240 • 20lt \$750 all ex GST

DECISION

A new selective herbicide for post-emergent weed control in new and established pasture, as well as in lucerne, chicory, clover and maize crops.

- Contains 800g/kg Flumetsulam in a water dispersible granule
- A clover-friendly herbicide; provides control of annual and perennial buttercups in pasture

ACVM No.P008368

200g **\$110.40** • 500g **\$207** all inc GST
200g \$96 • 500g \$180 all ex GST

RANGER

Ranger is a great weedkiller that controls docks and buttercup and is a selective herbicide for use in pasture, wheat, barley, and oat crops.

- Contains: 750g/kg thifensulfuron-methyl as a water-dispersible granule
- For use in conservation tillage.

ACVM No.P7668

100g **\$87.40** • 1kg **\$851** all incl GST
100g \$76 • 1kg \$740 all ex GST

Please note: Due to high freight costs to the South Island, our Homecare products are only available in the North Island.

\$35 FREIGHT FEE FOR ALL ORDERS UNDER \$250*

*Agmax Products: The cost of delivering small orders is high, compared with the value of your order. This is an incentive to order more than \$250 of Agmax products. Prices include GST. Prices are subject to change without notice.

Nitrosol Product Range

NITROSOL ORIGINAL

Nitrosol Original ovine blood and bone for use in all horticultural crops and home gardens. Nitrosol Original has a balanced NPK of 11.5.7 plus trace elements and minerals and recommended for use in all horticultural crops and home garden.

20lt **\$185.90** • 100lt **\$615.00**
200lt **\$966.00** • 1000lt **\$4620.00**

NITROSOL NITROGEN BOOSTER

Nitrogen Booster is a high nitrogen liquid formulation containing a balanced blend of nitrogen rich materials from plant based amino acids and dissolved urea. Nitrogen Booster has 21.5% nitrogen.

20lt **\$115.00** • 100lt **\$425.00**
200lt **\$650.00** • 1000lt **\$2995.00**

NITROSOL BLENDS

For ease of application and for an extra nitrogen boost, we can blend Nitrogen Booster with Nitrosol Oceanic or Nitrosol Original. Call us to discuss blending options and pricing.

NITROSOL CALCIPRILL

is a 2-6 mm lime granule made from finely ground, high purity limestone. It is low in dust, easy to spread and breaks down rapidly in moisture.

It gives you the option of using your own fertiliser spreading equipment for a timelier application and can lower the risk of introducing off-farm pathogens or weeds.

500kg bag **\$225.00**

NITROSOL OCEANIC

Nitrosol Oceanic is a liquid fertiliser manufactured from deep-sea fish blood and bone plus trace elements and minerals with a balanced NPK of 11.5.7.

20lt **\$193.05** • 100lt **\$625.00**
200lt **\$990.00** • 1000lt **\$4725.00**

NITROSOL MAGSULPHATE

includes 7.5% organic carbohydrates to feed and stimulate biological activity in the soil. Magnesium is an important plant nutrient that is often found to be deficient in New Zealand crops. Sulphur is essential for productive pastures, crops and animals.

200lt **\$300.00** • 1000lt **\$1421.00**

NITROSOL ORGANIC

is a new liquid organic fish fertiliser developed for use as a certified input for organic farmers. Silky smooth and not guggy with a vastly improved odour. Certified Biogro organic input and IFOAM accredited. NPK of 6.1.3

20lt **\$200.20** • 100lt **\$635.00**
200lt **\$998.00** • 1000lt **\$4777.00**

NITROSOL SEAWEED FLAKES

100% soluble seaweed flake derived from Ascophyllum Nodosum. Certified Biogro organic input and IFOAM accredited.

2kg pack **\$58.00** • 20kg box **\$529.00**

NITROSOL GIBB A90

is a water soluble powder of gibberellic acid, a naturally occurring plant growth promotant. Apply at only 9gms per hectare.

ACVM No.P009145

540g tub **\$475.00**

Please note Nitrosol product prices exclude GST & delivery, and are subject to change without notice. Purchase your products direct from Nitrosol Limited or your local rural merchant, eg: Farmlands, PGG Wrightson, Fruited, FarmSource, Horticulture etc.

THE LAST LAUGH

Questions we just can't answer?

Why do we press harder on a remote control when we know the batteries are flat?

Why do banks charge a fee on 'insufficient funds' when they know there is not enough?

Why does someone believe you when you say there are four billion stars, but check when you say the paint is wet?

Why is it that people say they 'slept like a baby' when babies wake up every two hours?

Do married people live longer than single ones or does it only seem longer?

How is it that we put man on the moon before we figured out if would be a good idea to put wheels on luggage?

Why do people pay to go up tall buildings and then put money in binoculars to look at things on the ground?

Why is there a light in the fridge and not in the freezer?

Why do the Alphabet song and Twinkle, Twinkle Little Star have the same tune? Stop singing and read on...

Why when you blow in a dog's face does he get mad at you, but when you take him on a car ride, he sticks his head out the window?
