

# ClearView BUTTERFLY Zoo

## CONTENTS INCLUDE

### SMALL ROUND CONTAINERS

Each of your two containers house three painted lady caterpillars and food.

### LONG, TRIANGULAR TUBE

One tube for the body of your growing house.

### TRIANGULAR END CAPS

Two end caps to keep baby caterpillars safe inside your growing house.

### CATERPILLAR FOOD STAND

One food stand to hold two small food containers.

### GROWTH CHART & CRITTER STICKERS

This chart & stickers will help you record the journey from caterpillar to butterfly.

### PAPER FLOOR

One paper floor to replace food stand after caterpillars become chrysalides.

### WOOD STICK

One wood stick to clear away caterpillar silk.

### COTTON SWAB

One cotton swab for helping baby caterpillars stay on their food.

### BUTTERFLY ZOO

One butterfly zoo with zipper top to house your adult butterflies.

### PLASTIC SPOON

One plastic spoon to help retrieve fallen chrysalides.

## ASSEMBLE YOUR CATERPILLAR GROWING HOUSE

### STEP 1

Pop up the clear sheet to form a LONG, TRIANGULAR TUBE.

*Make sure the seam of the tube becomes the floor of the CATERPILLAR GROWING HOUSE.*

## ASSEMBLE YOUR CATERPILLAR GROWING HOUSE – Continued

### STEP 2

Create your CATERPILLAR GROWING HOUSE by first popping one TRIANGULAR END CAP onto an end of the LONG, TRIANGULAR TUBE.

*Make sure the end cap snaps into place. Keep the opposite end of the LONG, TRIANGULAR TUBE open.*

### STEP 3

Carefully take the lids off the TWO SMALL CONTAINERS with the baby caterpillars inside.

*If they stick to the lid or fall out, use the cotton swab to gently place them on the food surface. The caterpillars create silky webs inside the cup for their protection. If some of the silk comes off when the lid is removed, this is okay – they will make a lot more!*

### STEP 4

Place the TWO SMALL CONTAINERS in the two holes of the CATERPILLAR FOOD STAND.

### STEP 5

Push CATERPILLAR FOOD STAND into the open end of the LONG, TRIANGULAR TUBE, making sure the bottom of CATERPILLAR FOOD STAND is along the floor/seam of the tube.

### STEP 6

Close the CATERPILLAR GROWING HOUSE by popping the second TRIANGULAR END CAP onto the open end of the LONG, TRIANGULAR TUBE.

*Again, make sure the end cap snaps into place.*

### STEP 7

Keep your CATERPILLAR GROWING HOUSE away from direct sunlight and draft areas (windows, vents, etc.), and keep at room temperature for best results.

*Caterpillars will now eat and move around the CATERPILLAR GROWING HOUSE.*

### STEP 8

Hang up your ClearView Butterfly Zoo Growth Chart and keep track everyday of how your caterpillars grow with your Critter Stickers.
