ANATOMY

- Multifunction Button (MFB)
- Track Control
- Volume Control
- Built-in Mic
- Charging Jack
- LED Indicator
- Line-in Jack
ANATOMY

*RIGHT EAR PIECE

- Skip Forward
- Volume Up
- Volume Down
- Skip Back
- Play / Pause

**Function** | **Action**
---|---
Play/Pause/Answer/Hang Up | Press the MFB
Raise Volume | Press the volume up button
Lower Volume | Press the volume down button
Skip Forward | Press the skip forward button
Skip Back | Press the skip back button
Voice Command/Siri | Short Press the MFB & volume up button simultaneously
POWER UP

For best results, fully charge your Tuis before use.

For a full charge, plug the Tuis into your wall charger or computer via micro USB cable.

The LED indicator located below the right ear piece will flash red to indicate a low battery.

NOTE: It takes 3 hours to give your Tuis a full charge.

Power On/Off
ON: Press and Hold the MFB ⬇️ until you see a blue LED flashing to power on the device.
OFF: In standby mode, hold the MFB ⬆️ until you see the red LED flashing to power off the device.
**PAIRING**

Entering Pairing Mode
1. When the headset is off, press and hold the MFB down until the LED flashes red and blue alternately.
2. Release "button," you are now in pairing mode.

Pair
- Go to your device's Bluetooth settings
- ADD or SEARCH devices.
- When "ODT TUIS" appears, select it.
  *If asked for a pass code: Enter "0000"

After successfully connecting, the blue LED will flash twice every 4 seconds.

You should now be able to play music & make/receive calls using the headset. Hooray.

Reconnecting
- Automatic: Every time the headset is turned on, it will connect to its most recent device automatically.
- Manual: If it doesn't connect on standby short press any button once to connect.
The following are tips on how to use your Tuis to talk on the phone:

Battery Life: Continuous talk/music time 15 hours, Standby time/230 hours

*Battery life varies subject to different playing circumstances such as music type and volume.

Bluetooth Version: V4.0

Bluetooth Profiles: A2DP, aptX, AVRCP

Operating distance: 30 feet

Dimensions: 176 x 160 x 55 mm

Weight: 173g
1. Why is the LED flashing red twice every 30 seconds? The battery is low. Recharge it.

2. Why is the red LED off when charging?
   A. Make sure the connection between the charging cable and the Tuis is tight.
   B. If the Tuis haven't been used in awhile, the light may not come on immediately. Charge the battery for at least 30 minutes.

3. Why can't I pair my Tuis?
   Your Bluetooth device and the chips must both be in pairing mode.

4. Why can't I hear the sound on the headset?
   A. Make sure the Tuis are on.
   B. Make sure the volume is not too low or muted.
   C. Make sure the Tuis are properly connected with your device.
   D. Make sure the Tuis are within range of your device.

5. Why can't I hear the sound clearly on the headset?
   A. Move your Tuis closer to your device.
   B. Make sure your Tuis are charged up.
   C. Turn off your Tuis and device, then power up and reconnect.

6. Why the pause/play, last/next song not function when playing music?
   Make sure your Bluetooth device supports AVRCP (Audio/Video Remote Control profile)
- Keep the Tuis dry.

- Keep the Tuis away from direct sunlight or hot places. High temperatures will shorten the life of electronic devices, destroy the battery or distort certain plastic parts.

- Do not try to disassemble the Tuis.

- Do not let the Tuis fall onto the floor or other hard surfaces. The internal circuit board may get damaged.

- Do not use intensive chemical products or detergent to clean the product.

- Do not scratch the surface with sharp things.
THE TUIS THINK THEY’RE BETTER THAN YOU,

AND THEY MIGHT BE RIGHT.
DON’T BE SO ANTISOCIAL
