GARDEZ CHAQUE COMPOSANT DU KIT HORS DE LA PORTÉE DES ENFANTS.  
BEWAHREN SIE JEDE KOMPONENTE DES KITS AUSSERHALB DER REICHWEITE VON KINDERN AUF.

Our company is the only one able to offer you innovative, environmentally friendly, self-cleaning, easy to use and effective pigeons dissuaders.

The novelty of our birds dissuader is given by the shape of the same: a smooth and gliding surface that can be placed on gutters and eaves.

Once placed the dissuader on the area you want to protect, its tilting surface remains in an inclined position. Birds, gliding on that surface cause the oscillation and the passage from an inclined to an horizontal position. In this way pigeons go in contact with an unstable surface which forces them to move away, without, however, causing them physical damage of any kind.

Certificated polymeric materials with which we manufacture our pigeons dissuader guarantee excellent weather resistance.

## Bird Deterrent System – Polycarbonate Plastic

### Install in 4 Easy Steps

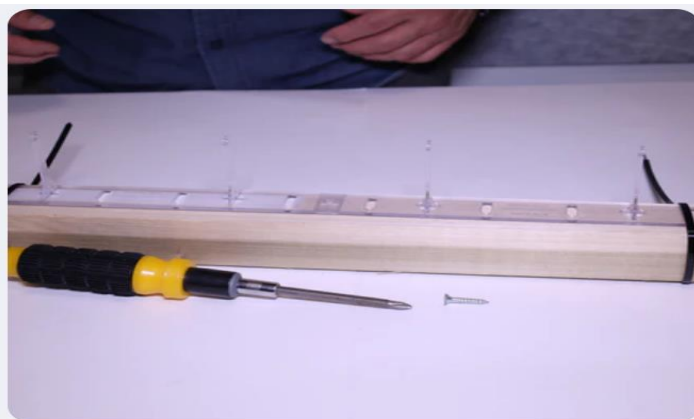

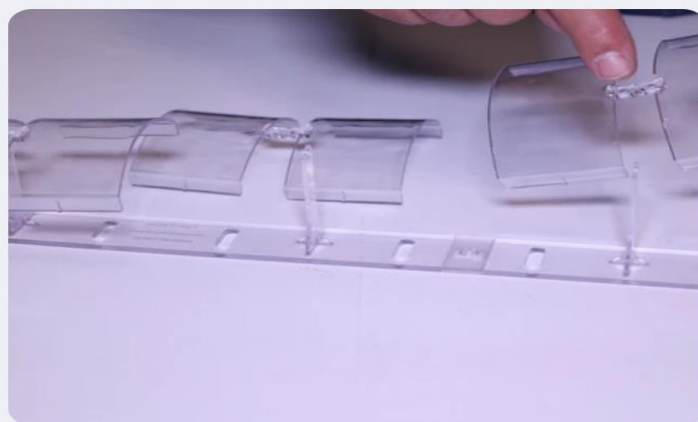

#### Step 1

By inserting the starting and ending points together. You can attach multiple strips of the Petslandia bird deterrent system.

#### Step 2

Remove the upper part of the deterrent to make the installation easier.

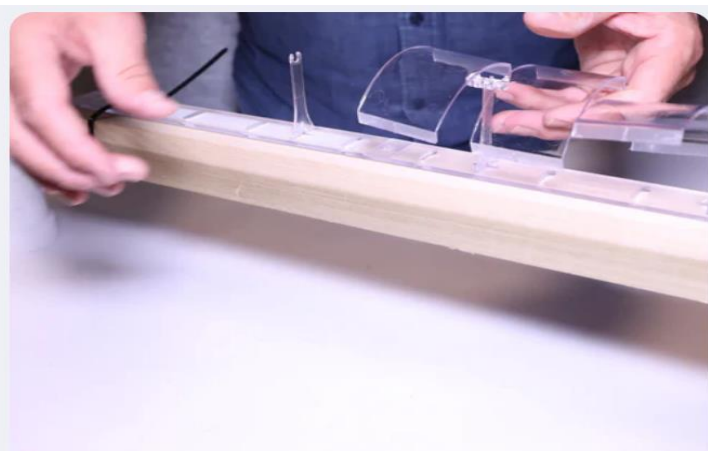

#### Step 3

You can use double-sided tape, screws, velcro, zip tie, or glue to install the Petslandia bird deterrent device.

#### Step 4

Once you're done fixing the deterrent to the surface. Attach the removed part of the deterrent.

## Installation Manual

Connect modulars base together.

To finish installing, simply click the parts onto the vertical holders.

Use the holes in the rail to align the screws.

During the time of installation the modular base must be aligned, with the edge of the wall.

1) Cut the tape to the same length of the rail.

1) Wrap the flex seal tie around the rail and secure it tightly.

1) Wrap the velcro tie around the rail and secure it tightly.

1) Put a moderate amount of sealant.  
2) Align and press it on the surface.  
3) Do the same process on the other rail.

2) Stick it on the rail.  
3) Peel the plastic layer of the tape and stick the adhesive on the surface.

2) cut the excess for a cleaner look.

2) cut the excess for a cleaner look.

4) To finish installing, simply click the parts onto the vertical holders.

4) To finish installing, simply click the parts onto the vertical holders.

3) To finish installing, simply wrap the parts onto the vertical holders.

## Bird Deterrent System – Stainless Steel Mini Spikes Strips
