

INSTALLATION GUIDE

PORSCHE MACAN SEQUENTIAL LED MIRROR TURN SIGNALS

FITMENT

- 2015+ Porsche Macan (all trims and variants)

TECHNICAL HELP

If you need technical assistance or help with the installation procedure, please email info@flat6motorsports.com for immediate help.

IN THE BOX

- 1X Smoked LED Sequential Turn Signal (Driver's Side)
- 1X Smoked LED Sequential Turn Signal (Passenger's Side)
- 6X Colored Dot Stickers to track wires

TOOLS NEEDED

- T-15 & T-25 Torx Bit / Driver
- Socket Wrench (if applicable)
- Trim removal tool

INSTALLATION STEPS

1) Start with one side of by pulling the mirror away from the body of the Macan.

Note – To protect painted surfaces, we recommend using painters or masking tape around the mirror surfaces and a towel on the door to prevent any sharp objects damaging the paint.

2) Use a trim pry tool to remove the mirror, the mirror is secured in the center of the mirror body, pry and pull straight out.

3) Use the provided colored dots to mark the male & female side of each connector so you can put back together in the same orientation. Place mirror aside in a safe place.

4) Remove the various T-15 & T-25 torx screws securing the mirror body.

5) Pull away the mirror housing and locate the remaining torx screws securing the turn signal light to the mirror housing. Remove screws and remove OEM light.

Removal of the factory turn signal light is complete.

6) Insert the Smoked LED Sequential Mirror into the housing, install torx screws securing the light to the mirror housing. Reinstall all electrical connections.

Note – We recommend testing the turn signal light at this point prior to reinstalling everything.

7) Reverse all steps to finish installation, make sure to reinstall all electrical connections and securing torx screws. The process is the same for the other side.
