
Instructions – Hanging Bar

The Hanging Bar is designed to make use of the upper area in the house. The bar can hold excessive weight and can be used to hang multiple baskets. The bar may also be used to secure water pipe to for overhead watering. The Hanging Bar is made from Australian made 'Metalcorp' galvanized steel. The size is 20 x 20 x 1.2mm. One or two bars may be fitted to the house.

1. The Hanging Bar is passed into the house through the doorway and through the roof bar bracing frame/s either on the left hand side or right hand side of the house as per picture below.
2. The flat pieces on each end of the Hanging Bar are attached (using the self drilling screws provided) to the door frame on each end of the house.

(For freight purposes the Hanging Bar may need to be joined together before installing using the self drilling screws provided).
