

HEATING FOILS

Size	Heating Foil with Dial thermostat	Heating Foil with Dial thermostat, Insulation foam & solashield covering
	\$	\$
1m x 1m	364	417
2m x 1m	440	537
3m x 1m	577	718
4m x 1m	694	879
5m x 1m	804	1033
6m x 1m	936	1189
7m x 1m	1058	1385
8m x 1m	1200	1561
9m x 1m	1332	1737
10m x 1m	1464	1913
11m x 1m	1596	2089
12m x 1m	1728	2265

Heating foil with weather resistant thermostat

Sizes from 1sq mtr up to 2 sq mtr – cost is \$220 per sq mtr plus thermostat

Digital Thermostat upgrade	\$43 extra
Insulation – Flexible thermal foam (for underneath foil)	\$35 per/mtr
Solashield protective sheeting (to cover foil)	\$9 per/mtr (1.8m wide)
Extra Lead (2 metre lead comes standard on the Heat Foil)	\$6 per/mtr

Heating equipment must be regulated by a weatherproof thermostat. The thermostat may be Dial or Digital type. Unless otherwise stated the Dial thermostat will be fitted. Heating foils comprise of an electrical element laminated between heavy aluminium foil and poly backing. It comes ready to use - simply roll out onto a bench. We highly recommend using our insulation foam underneath the heating foil to prevent heat loss, and solashield plastic covering to protect the foil from water ingress.

Specifications for Heating foil: 240 Volt, approx 150 watts per square metre. We custom make to most sizes. Ask us for a quote.

HEATING CABLE

For pricing please refer to the Heating foil table above.

Heat Cable is designed to be used in a pre-prepared propagating bed & buried in propagating sand medium.

The Heat Cable comes factory fitted with a Dial thermostat.

Sizes available in the Heating Cable start from 2m x 1m. Can be custom made to most sizes.

Specifications for Heating cable : 240 Volt, approx 150 watts per square metre.

Heating cable with weather resistant thermostat

THERMOSTAT (temperature controller)

A thermostat is imperative for accurate temperature control of all the above heating systems. The probe sensor is placed where the temperature is to be sensed eg at the root zone of the plants. Just set the dial at the desired temperature.

Thermostat Heat control THLPWS 0-50 °C in water resistant enclosure – Dial type	\$144
Pilot Light (for dial thermostat)	\$35
Thermostat Digital controller THDW minus 40 to plus 50 °C water resistant enclosure	\$187
Hanging Plate (for attachment to a surface) comes standard with the Digital thermostat	\$15

THDW

THLPWS

MISTING CONTROL SYSTEM (Balance Arm)

This misting system works on the principle of evaporation. As the moisture evaporates off the Balance arm, the arm tips upwards and switches the solenoid valve, allowing water to flow to the mist nozzles. Comes ready to use – just connect to water and power.

System price (not including mist heads or water pipe): \$462

- ✓ Control Transformer 24 VAC 930 Ma (\$62)
- ✓ Balance Arm controller c/w lead and 2 pin polarised plug (\$240)
- ✓ Power Plug board c/w 2 polarised sockets (\$90)
- ✓ Water Solenoid 20mm 24 Volt AC (\$70)

Mist head each (1.2Mtr spread. Flow rate @30psi = 61 Ltr per hr) \$15

Water pipe available - Price on application

HEAT PADS – FLEXIBLE

Heat pads are water resistant and are suitable for plant propagation, hydroponics, brewing, pet/animal care and various other purposes which require low heat. Higher wattage heat pads are available for Brew use and for higher heat output purposes. We can custom make the heat pads to suit your requirements.

Product name	Size	Wattage	Heat pad - Plants		Heat pad – Pets	
			\$	\$	\$	\$
SMALL	280 X 340mm	10	78	93		
MEDIUM	340 X 600mm	20	123	138		
KYTAB	360 X 540mm	25	123	138		
NARROW	300 X 700mm	28	152	167		
MEDIUM WITH LIP	400 X 670mm	28	188	n/a		
LARGE	500 X 1100mm	125	398	413		
LONG	400 X 1400mm	125	398	413		
JUMBO	600 X 1200mm	120	430	445		
HYDROPAD	750 X 1250mm	200	470	485		

Thermostats are available for heat pads to give exact temperature control - see above
