UNIQUE FEATURES

WHY OUR GREENHOUSES STAND OUT FROM THE REST

POLYCARBONATE
6mm Twinwall
Keeps the warmth in and the frosts out, protecting your plants during the colder months. Covered by a 10-yr warranty against breakage and panel blowouts!
The practical choice!

SAFETY GLASS
4mm Toughened
Glass provides superior clarity and longevity and is now significantly stronger. Made to NZ safety standards, this glass can take almost anything you can throw at it. Includes 25yr glazing warranty.
Looks stunning!

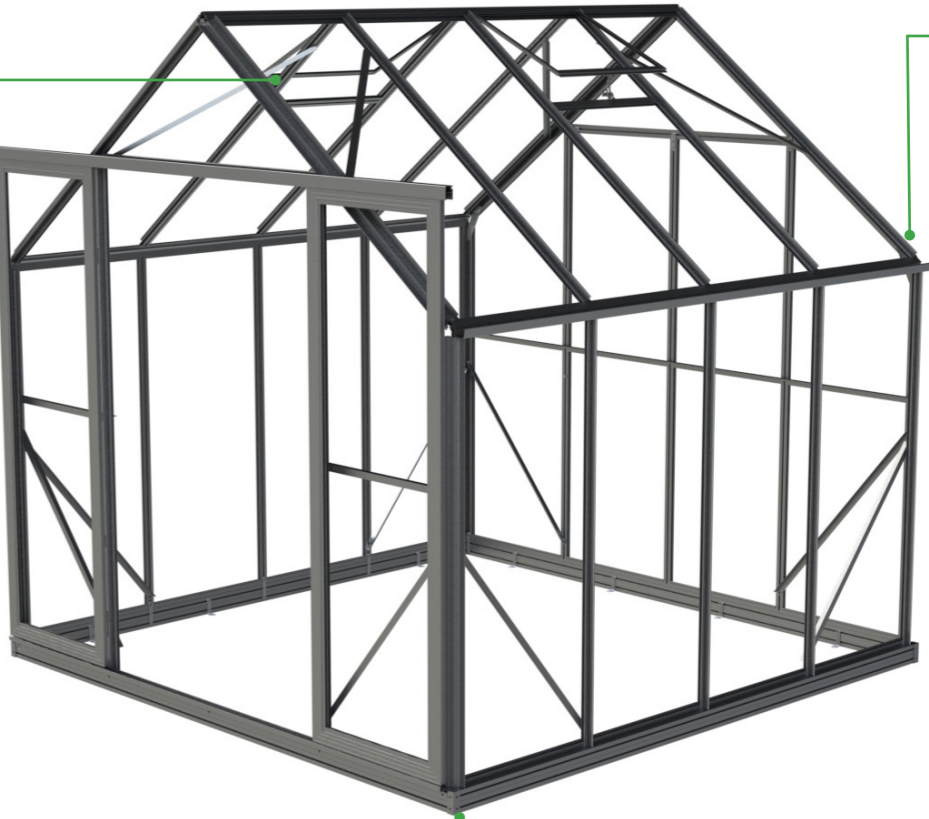

SHADE MESH
Expanded Aluminium
The durable aluminium mesh screen blocks out the harsh sun (approx 50%) while providing adequate air-flow and ventilation to promote optimal plant growth.
Includes 15-yr warranty.

OPENING VENTS
Adjustable opening roof vents provide adequate ventilation and temperature control. Automatic vent openers are also available, pictured below.

DURABLE
Long lasting, powder coated finish in black with Dulux Powder coat. Looks great and requires minimal maintenance. Covered by Dulux non-fade warranty.

ALUMINIUM FRAME
Heavy duty aluminium frame to provide years of trouble free service with minimal maintenance.

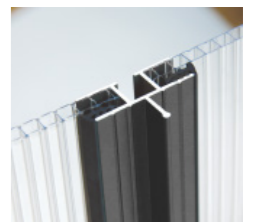

BASE INCLUDED
All Winter Gardenz Greenhouses come with a strong aluminium base and have foundation mounting options to suit most applications.

SUPERIOR DESIGN AND CONSTRUCTION
Winter Gardenz unique design delivers superior strength and durability. There is no other that comes close.

RAINWATER GUTTER SYSTEM
Unique gutter system for collecting rain water.

RUBBER BEADING
Unique rubber bead sealing system designed to hold the glazing panels firmly in place while adding significant strength to the overall structure.

HOW TO CHOOSE THE GREENHOUSE FOR YOU?

STEP 1
Choose a frame width. 6ft, 8ft, or 10ft series. This also determines the height of Greenhouse.

STEP 2
Choose the length. 6ft, 8ft, 10ft or 12 ft right up to 36ft or longer. We can also do custom lengths.

STEP 3
Choose the Glazing. Toughened Safety Glass, Shade Mesh, or Insulating Polycarbonate

ELITE SERIES GREENHOUSES

TRADITIONAL STYLE - SUPERIOR QUALITY

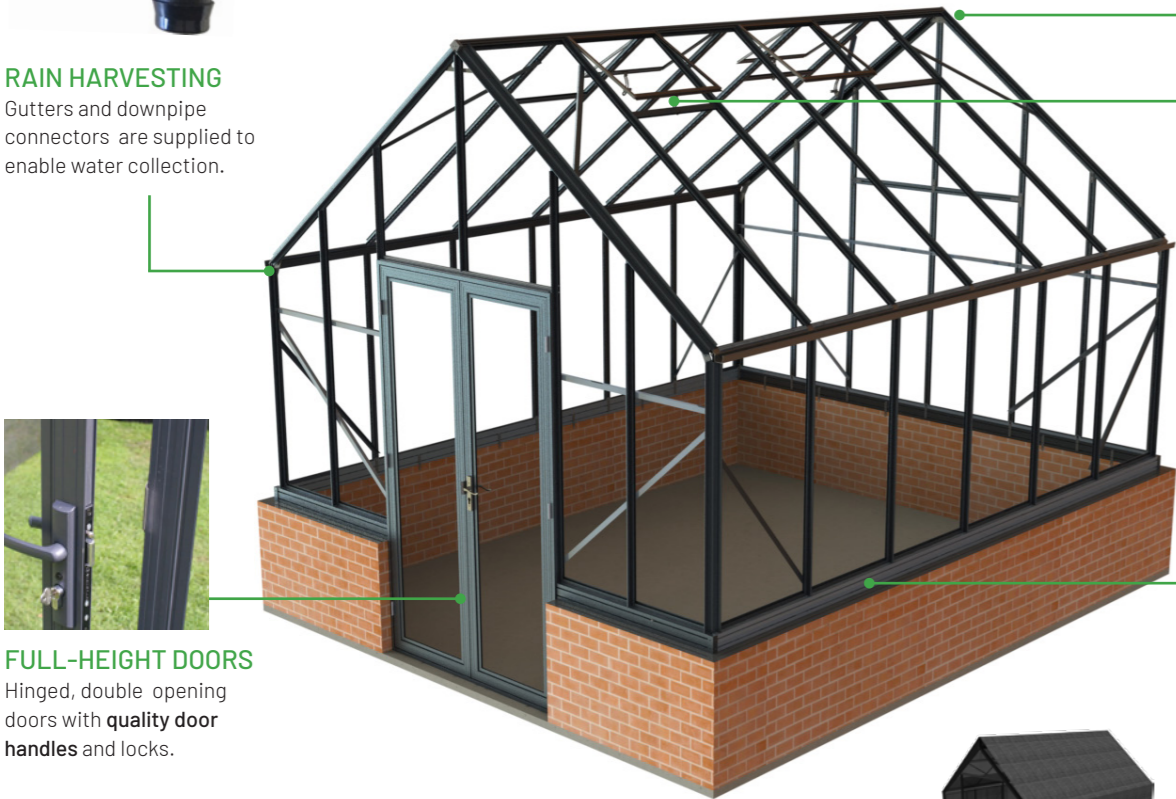

WINTER GARDENZ ELITE RANGE is constructed using only the best materials and design systems to ensure structural integrity of the greenhouse, while also delivering elegance and functionality.

RAIN HARVESTING
Gutters and downpipe connectors are supplied to enable water collection.

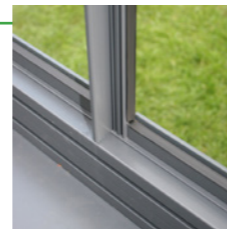

FINIALS & CRESTINGS
These are optional and considered a lovely finish if you prefer the Victorian style of Greenhouse.

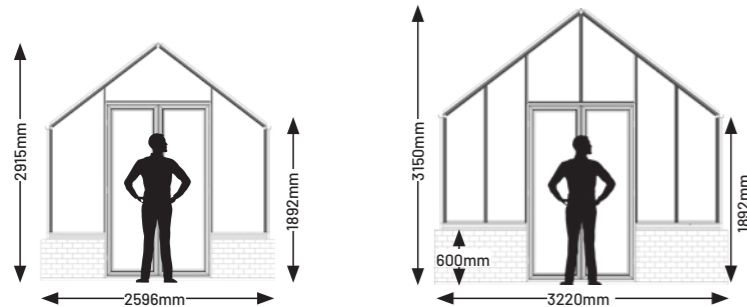

OPENING VENTS
Temperature controlled vents open and close automatically to assist in maintaining the optimum temperature.

FULL-HEIGHT DOORS
Hinged, double opening doors with quality door handles and locks.

SHADE SYSTEM
The shade-cover system provides protection for your plants in the hotter months and is removable when not required.

Superior design & construction
The unique design delivers superior strength and durability, with minimal maintenance required.

All Elite Greenhouses are supplied fully optioned and include the following:

- ✓ Double-hinged lockable doors
- ✓ 3 tier staging down one side of the greenhouse
- ✓ Shade cover system to protect plants in summer
- ✓ Glazed with 4mm toughened safety glass
- ✓ Temperature controlled vent openers
- ✓ Gutter system for rain catchment
- ✓ 25-year warranty

*Custom sizes also available. Typical foundation plan is provided with each kitset. Brick wall shown is for illustration purposes only, it is not included in the kitset.

MULTIZONE GREENHOUSES

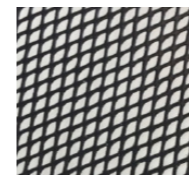

TWO GROWING ENVIRONMENTS IN ONE STRUCTURE

THE MULTIZONE GROWHOUSE is a unique and innovative product that offers the grower the versatility to grow in just about any climate.

SMOOTH SLIDING DOORS

Smooth sliding doors which incorporate a stainless steel bearing roller system - runs effortlessly on its track for years.

SHADE MESH

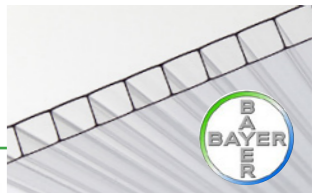

Expanded Aluminium
The durable aluminium mesh screen blocks out the harsh sun (approx 50%) while providing adequate air-flow and ventilation to promote optimal plant growth.

SHADE ZONE FOR HARDENING OFF

HOT HOUSE ZONE FOR PROPOGATING

OPENING VENTS

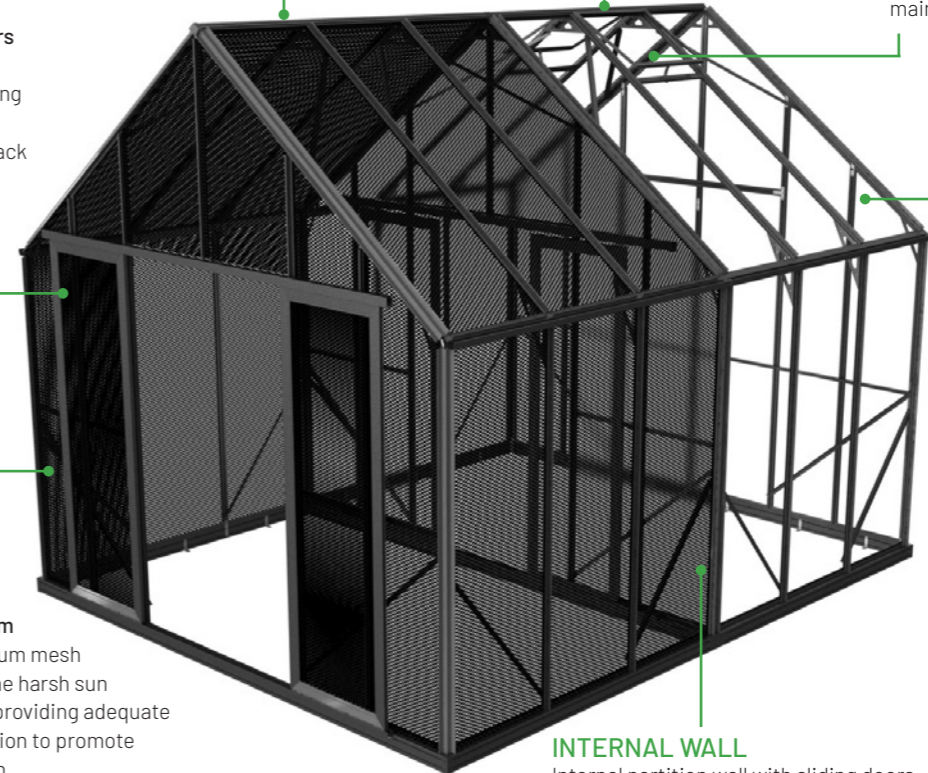

Temperature controlled vents open and close automatically to assist in maintaining the optimum temperature.

POLYCARBONATE

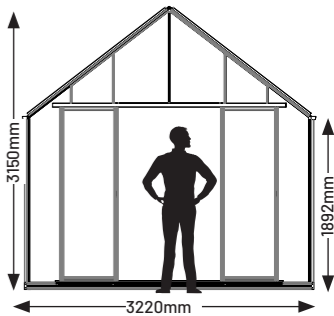

6mm Twinwall

Keeps the warmth in and the frosts out, protecting your plants during the colder months. Covered by a 10-yr warranty against breakage and panel blowouts!

INTERNAL WALL

Internal partition wall with sliding doors, glazed with polycarbonate to retain warmth in the hothouse zone.

- ✓ **Adaptable design for all seasons**
Both Hot-House and Shade-House, in one structure
- ✓ **Rigid aluminium shade panels in the Shade-House zone**
Blocks out the harsh sun and wind. Also suitable for insect and pest protection

- ✓ **Thermally efficient polycarbonate glazing in the Hot-House zone**
Keeps the warmth in and the frosts out
- ✓ **Strong and durable frame**
Practical and tough, requiring minimal maintenance

Winter Gardenz MultiZone Greenhouses are designed to provide growers with the best of both worlds: an enclosed Hot-House with adjoining Shade-House, separated by an internal partition wall and sliding door, to create the two zones in one structure.

Our MultiZone Growhouses are constructed from the same durable frame as our popular award winning Greenhouse range, which provides a strong, practical and long lasting structure, requiring very little maintenance.

The Shade-House zone is designed to protect your plants from the heat of direct sun-light, damage from high wind, pests & insects, while still providing adequate ventilation and air movement in the hot months. It is perfect for light-sensitive plants such as orchids, azaleas and ferns, etc., but is more commonly used for 'Hardening Off' young, delicate plants that have been propagated in the Hot-House Zone.

The Hot-House zone is glazed with 6mm twin-wall polycarbonate and creates an ideal growing zone for plants and seedlings, especially when the outside temperature cools. This glazing provides superior thermal efficiency, keeping the warmth in and the frost out.

10X12 MULTIZONE GROWHOUSE UG1012XH-MZ
W 3220 x L 3890 x H 3150mm
• Integrated 8ft hothouse with 6ft shade house
• 2x double sliding doors, internal partition wall, 2x vents

10X20 MULTIZONE GROWHOUSE UG1020XH-MZ
W 3220 x L 6386 x H 3150mm
• Integrated 10ft hothouse with 10ft shade house
• 2x double sliding doors, internal partition wall, 4x vents

10X16 MULTIZONE GROWHOUSE UG1016XH-MZ
W 3220 x L 5138 x H 3150mm
• Integrated 8ft hothouse with 8ft shade house
• 2x double sliding doors, internal partition wall, 4x vents

10X24 MULTIZONE GROWHOUSE UG1024XH-MZ
W 3220 x L 7634 x H 3150mm
• Integrated 12ft hothouse with 12ft shade house
• 2x double sliding doors, internal partition wall, 4x vents

*Custom sizes and glass option available instead of polycarbonate.

Unique and practical design, that looks great and provides a versatile and flexible approach to year-round growing.

SHELVING, STAGING, AND ACCESSORIES

PRODUCTS TO MAKE THE MOST OF YOUR GREENHOUSE

STANDING SHELVING

- 360mm depth, 2-tiers
- Aluminium construction with stainless steel fasteners
- Strong, durable and low maintenance.

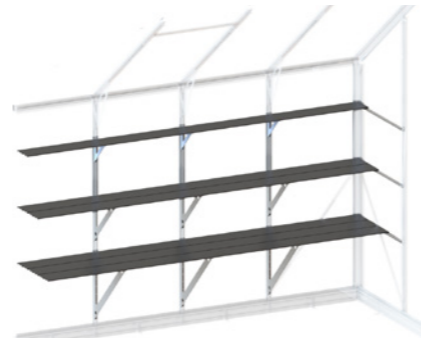

Potting Bench 900mm wide PB0900
Potting Bench 1200mm wide PB1200

WALL MOUNTED SHELVING

- 300mm depth
- Aluminium construction with stainless steel fasteners
- Attach at any height, easy to install.

Wall Shelving 900mm wide HS0900
Wall Shelving 1200mm wide HS1200
Wall Shelving 1500mm wide HS1500

3-TIER STAGING

- 150, 300 and 450 mm depth
- Maximise growing space

Staging 6ft Long ST06
Staging 8ft Long ST08
Staging 10ft Long ST10
Staging 12ft Long ST12

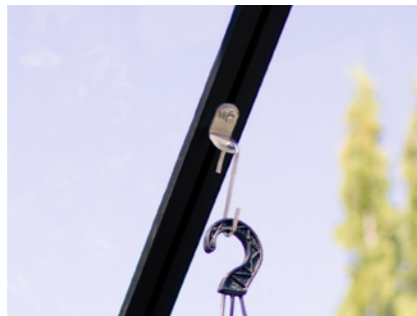

*Single shelves also available in all sizes

SHELVING BRACKETS

- Cost effective shelving
- Sold in pairs with fasteners

Shelving Brackets 150mm wide SB150
Shelving Brackets 300mm wide SB300
Shelving Brackets 450mm wide SB450

HANGING BRACKETS

- Create vertical or horizontal string lines, or use for hanging plants

Hanging Brackets 6pk HBA6

AUTO VENT OPENERS

- Ideal for Summer
- Opens when it's hot and closes when it's cold.
- Strong, durable and reliable.
- No power required, easy to install.

Auto Vent Opener AV01

LOUVRE VENT KITS

- Designed to be installed into the side walls of the greenhouse. Allows cool air to enter, while hot and stuffy air ventilates through the roof.

Louvre Vent Kit (Poly) LVK3-PC6
Louvre Vent Kit (Retro Poly) LVK3-PC6-RETRO
Louvre Vent Kit (Glass) LVK3-TG4

SHADE COVER KITS

- Protect plants from the sun's harsh rays (70% block-out).
- Reduces the inside temperature to prevent plants from overheating in the hot sun.
- Supported in position with a durable aluminium frame system.
- Various sizes available.

MESH SCREEN DOOR

- Allow more air to get in. A screen door on your glass or polycarbonate greenhouse is another option to help with airflow inside while keeping pests out.

Mesh Screen Door SD1953
Top Door Extension (for 6ft models only) L621-1900

12FT SERIES

THE LARGEST OF OUR RESIDENTIAL SERIES GREENHOUSES

Winter Gardenz' stunning new 12ft series is the largest in the residential greenhouse range, standing at nearly 4m tall (2.4m to the eave) and offering a spacious 3.8m width over a range of lengths. The 12ft series offers a significant step up from the 8ft/10ft Elite range, both in terms of height and interior living space.

Built to Winter Gardenz exacting standards, the 12ft series is constructed from durable, quality materials. The aluminium and glass structure is supported by a galvanised steel substructure, and all structural components are powder-coated with a quality Dulux

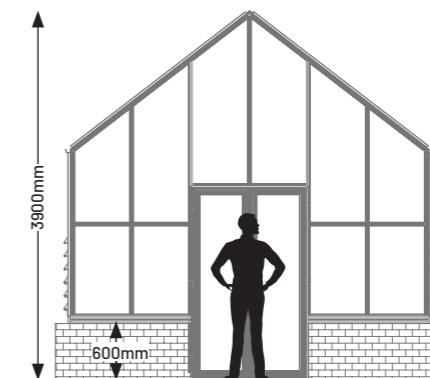

finish, to provide a low maintenance and easy-clean surface for years to come.

The 12ft series comes with one set of double-hinged lockable doors as standard, and both roof and louvre vents to provide adequate ventilation. Additional doors, vents, and shelving can also be added if required.

The 12ft series is a durable and elegant structure that will stand the test of time.

CUSTOM & ARCHITECTURAL GREENHOUSES

DESIGNED AND BUILT TO SUIT YOUR REQUIREMENTS

ARCHITECTURAL

Whether it's an aesthetically pleasing space to entertain and relax in, an effortless way to grow your plants year-round, or just a reason to spend more time outside, our architectural glasshouses allow our clients to enjoy one of life's most simple pleasures - outdoor living that isn't controlled by the weather.

Our architectural Glasshouses make a beautiful modern addition to lifestyle properties, commercial properties, and hospitality venues, providing the ideal space for entertaining and events, all but removing the boundary between people and the natural environment around them.

Our custom architectural glasshouses are bespoke structures made from the highest quality materials using highly innovative and engineered custom designs. From concept, design, and engineering, through to manufacture and construction, we deliver every step of the process with a clear dedication to quality and meticulous attention to detail.

We offer a full range of lengths, widths, and heights to suit each client's specific needs and spatial requirements. We can even alter the roof pitch to achieve optimum growing conditions, create an architectural statement, or simply match the aesthetics of your existing property.

QUARANTINE AND RESEARCH

In addition to our Greenhouses being ideal for commercial growing operations, the unique design and construction also makes them a suitable structure for Biosecurity, Plant Containment, Test and Research Greenhouses.

Talk to the team at Winter Gardenz to discuss a tailored solution that will suit your requirements and provide years of trouble free service.
