(23) JACOB, François MONOD, Jacques PARDEE, Arthur Beck

Sur l'expression et le rôle des allèles "inductible" et "constitutif" dans la synthèse de la β -galactosidase chez des zygotes d' "Escherichia coli.

C. R. Acad. Sci. (Paris) 246 (28 May 1958), 1958.

The "PaJaMo" experiment of PARdee, JACob, and MOnod "broke the impasse in Crick and Brenner's comprehension of how information in the sequence of bases in DNA came to be expressed as a sequence of the amino acids in protein, and thus led to the theory of the messenger and the solution of the coding problem" (Judson 390). included in this offering are both offprints as follows:

The Genetic Control and Cytoplasmic Expression of Inducibility™ in the Synthesis of β -galactosidase by E. coli

Item Description: J. Mol. Biol. 1 (1959) 165-78, 1959. PAMPHLET. Book Condition: Very Good. First separate editions. Original wrappers. Offprint. Very good. Staples little rusted. Garrison and Morton 6894 The PaJaMo experiment of PARdee, JACob, and MOnod broke the impasse in Crick and Brenner's comprehension of how information in the sequence of bases in DNA came to be expressed as a sequence of the amino acids in protein, and thus led to the theory of the messenger and the solution of the coding problem (Judson 390). This was recorded definitively in The Genetic Control and Cytoplasmic Expression of Inducibility in the Synthesis of β -galactosidase by E. coli, J. Mol. Biol. 1 (1959) 165-78. Could not find any other copies of this offprint offered at auction or in specialist catalogs or inventory.

Both offprints in one lot available at reduced net price till Sept 30th of \$4000.00 reduced from \$8000.00

New to our catalog from our non-History of science inventory.

(28) T. H, Morgan, Correns, Boveri, , Zimmer, Delbruck, Pincus, Chang, Wllson and many others, Large seminal important collection of Offprints in Molecular Biology, Cytology, Genetics over 3000 items

cataloged collection is now housed in individual protective sleeves. Arguably the largest group of important offprints available, outside of institutional holdings . Over 3000 offprint groups (some single offprints, some up to 110 offprints in each group), cataloged. Ask about details. Included are important offprints in Molecular Biology, Cytology, early genetics, zoology, botany. PaJaMo Experiment; Timofeev-Resovskij, Zimmer, Delbruck "The Green Paper"; Pincus and Chang Invitro, The Pill; Theodor Boveri, Edmund Wilson, early genetics, many others. Many inscribed, signed, or ownership stamp of early geneticists: Boveri, Edmund Wilson, Correns, and many others. im. arguably the most important collection of offprints offered on the open market in decades.. I doubt this collection could be duplicated with original copies, Provenance Will Provine 62,500.00

We continue going through the vast number of offprints we acquired in 2013 from Will Provine which much he had inherited from Sewall Wright. It continues to keep us busy.

(29) Min Chueh Chang M.C. Chang with Gregory Pincus and others Chang, M. C. 116 offprints dating from 1940-1980 by Min Chueh Chang from the Robert H. Foote collection (researcher in In Vitro fertilization at Cornell)

2 of the offprints are inscribed and signed by Chang. One is inscribed. Included are offprints co-authored by C. Polge, J. H. Casas, Dorothy M. Hunt, Y. Tsunoda, J. H. Marston, Anna L. Southam, C. M. Lubicz-Nawrocki, A. Hanada, Z. Morita, K. Niwa, William F. Busby, Priscilla Hele, R. H. F. Hunter, W. G. R. Marden, J. M. Bedford, R. Yanagimachi, Toyoda, L. E. A. Rowson, Charles Turbyfill, J. M. Bedford, J. L. Hancock, M. J. K. Harper, S. Pickworth, R.W. McGaughey, M. Said Mounib, Stella Pickworth, G. Pincus, Arthur Walton, Thorsteinn Thorsteinsson, E. B. Romanoff, Diane Sheaffer, James J. McDonough, Thomas S. Matney, John B. Loefer, Luis Fernandez-Cano. Most are in very good condition.. Some are annotated by Foote, and others with highlighting and underlining. All original in wrappers. First separate editions. Co-developer of Oral Contraceptives. M.C. Chang, was a Chinese-born American reproductive biologist. His specific area of study was the fertilisation process in mammalian reproduction. Though his career produced findings that are important and valuable to many areas in the field of fertilisation, including his work on in vitro fertilisation which led to the first "test tube baby", he was best known to the world for his contribution to the development of the combined oral contraceptive pill at the Worcester Foundation for Experimental Biology.
