(50) Edwards, Robert G. A group of 14 offprints by Robert G. Edwards awarded The Nobel Prize in Physiology or Medicine 2010 by Edwards, Robert G. \$3000 very good English physiologist and pioneer in reproductive medicine, and in-vitro fertilisation (IVF) in particular. Along with the surgeon Patrick Steptoe, Edwards successfully pioneered

conception through IVF, which led to the birth of Louise Brown on 25 July 1978. They founded the first IVF program for infertile patients and trained other scientists in their techniques. Edwards was the founding editor-in-chief of Human Reproduction in 1986. In 2010, Edwards was awarded the Nobel Prize in Physiology or Medicine "for the development of in vitro fertilization".
