INTRODUCTION

Upcycled Bag Products

We advocate the critical necessity for the fashion industry to commit to sustainable and ethical standards which are today considered "alternatives" to the typical manufacturing process. Our mission is to change these perceived "alternatives" into the norm. All our bags, clothing and accessories are made using discarded or underutilised materials such as seatbelt, advertising banners and felt. To ensure fair and responsible practices, we manage the entire value chain in-house, from design to production to sales. This enables us to customise our products and to include custom branding.
