Australian Sheepskin Apparel

Australian Sheepskin Apparel provides sheepskins of the highest quality which meet Australian and international standards. Products are available in both high quality medical and domestic grades.

Medical sheepskins may be laundered at high temperatures and tumble dried. Sheepskins may be washed repeatedly when laundered to the recommended standards, and can be sanitized to the same degree as normal hospital linen.

Please ask about Australian Sheepskin Apparel special sanitizing detergents.

Warranty void if not laundered in SKINSAN Natural Sheepskin Detergent.

### Pressure relief, moisture absorption and shear reduction you can rely on.

The most naturally wonderful, comfortable and effective product for the prevention and treatment of wounds that healthcare has ever seen. Once you explore and feel the texture of Australian Medical Sheepskin, you will understand the amazing benefits to both patient and caregiver alike. This product was specifically designed to save healthcare millions of dollars by not only treating but preventing bed sores, while at the same time giving comfort to long-term and palliative care patients.

### Look for the Leather back...

Only real sheepskin has a leather back. Manufactured fabrics have a knit back that may or may not be coated with a rubber or plasticized material.
