Subject: Sheepskin Review

This letter is to advise how the Medical Sheepskin we purchased from Australian Medical Sheepskin saved our father!

Our father had a stroke and was left paralyzed on the right side. He was unable to walk or use the right side of his body. This meant he was confined to a wheelchair for most of the day, then in bed where he was unable to roll over himself, without the aid of the care staff. He began getting bedsores soon after his stroke, so we looked at our best option of prevention, and the Australian Medical Sheepskin was recommended as the best option! Not only did it prevent sores from returning, due to the fact that it can be washed (according to the instructions given), which was extremely helpful in case there was an "accident". This was proven again when a nurse, unfamiliar with the benefits of the sheepskin, decided to wash it and put it away. We couldn't figure out why he had sores beginning again, only to discover that they had quit using the sheepskin! We had to get medical dressings in that were expensive to use, to heal the sores, and then back to the sheepskin where he continued to thrive and no sores! We 100% believe in this product!

Sincerely, Jamie & Elanne Welker=
