

Hockley Airsoft Arena

General Advice

Please read before playing:

1. Due to changes to our insurance shooting glasses are no longer allowed to be worn as eye protection in the arena. Participants must wear a full face mask or goggles (*not mesh*) which fit close to the face. Any customer wishing to play with a mask which has mesh protection for the eyes **MUST** wear safety glasses under it.
2. Customers who bring their own masks must ensure that they meet British safety standards. If wearing a mesh lower mask customers must wear goggles for eye protection **NOT** shooting glasses.
3. Legs and arms **must** be covered.
4. Wear **loose fitting** clothing. Playing wearing loose clothing reduces the sensation of being hit by an airsoft BB to one similar to a light tap. Playing in skin-tight clothing such as leggings, skinny jeans or a tight T-shirt or leaving areas of skin exposed may result in minor bruising. Baggy jeans or combat trousers are advised. Jogging bottoms are best worn **under** jeans or combat trousers.
5. **It is advisable to cover all exposed skin** we provide full facemasks which protect the eyes, nose, ears and mouth. In addition to this protection many players opt to wear gloves and a scarf. Hoodies are great in protecting the back of the head. **At a bare minimum we strongly advise wearing gloves.**
6. Flat shoes should be worn with a heel height of no more than 20 mm. You must have soft soles on your shoes which will provide better grip on the carpets of the arena. Trainers or combat style boots are ideal.
7. Mobile phone screens can be damaged by airsoft BB's please use a protective case to prevent damage or place them inside clothing with the screen facing the body. We strongly advise phone are left in the saferoom and **not** taken into the arena.
