

Doctors Without Borders, Spain

Communicating on missions around the world

With an international team of 7000+, Doctors Without Borders needed a flexible, effective, and accessible language-learning solution.

87% of learners found the app fun to use

85% of learners would recommend Babbel to a colleague

Top 3 Reasons To Use Babbel

- ✓ Accessible to all volunteers, regardless of location
- ✓ Flexible to different work circumstances
- ✓ Enables learners to reach a solid foundation and advance in a new language

The Challenge

[Doctors Without Borders](#) is a non-profit organization that brings medical humanitarian assistance to victims of conflict, natural disasters, epidemics, or healthcare exclusion.

[Médicos Sin Fronteras](#) (MSF) is the Spanish leg of the operation and sends close to 200 volunteers to various places around the world every year, meaning that speaking different languages is essential to efficiently help people on their missions.

Why Babbel?

Médicos Sin Fronteras needed a language-learning solution that catered to the full spectrum of volunteers and was location-independent.

"The only way we can offer language courses to all volunteers working abroad is with Babbel."

Josep Prior,
Head of Learning at
Médicos Sin Fronteras

Prior says that Babbel fits well with the volunteers' pace of work. "The doctors' schedules are always changing. So the flexibility of Babbel allows them to learn in between projects and jump

back in at any time." Besides that, volunteers can also use Babbel offline, which is handy in WiFi-free zones.

"The team is pleased with the diversity of situations and interactions, and finds Babbel easy to use and fun."

Prior adds that the team finds Babbel relevant to real-life situations and appreciates the bite-sized lessons and flexible alternative to classroom-based learning. **He is delighted with the development his team has made in their second language and their new-found enthusiasm for self-learning.**

Summary

Babbel offers a solution for MSF to provide language learning to volunteers on a global scale, resulting in improved collaboration and communication on their missions.
