

Inerv8

by ChiroNutraceutical

Inerv8 by ChiroNutraceutical™ provides a 1-2 punch for individuals who experience nerve pain, have experienced nerve injuries, and have or are predisposed to degenerative neurologic conditions. Containing only 2 ingredients, it is hyper-focused on providing the benefits above.

Why It's Important: The ingredients in Inerv8 have been clinically researched and shown to be safe and effective in reducing the pain associated with neuropathies, improving nerve fiber regeneration, and improving vibration perception in patients with neuropathy. Additionally, it has proven nerve-protecting benefits in patients with peripheral neuropathies and helps reduce and control high blood sugar.

Key Ingredients:

Alpha Lipoic Acid (ALA): When looking at data from clinical trials, ALA has revealed to be efficient in particular diseases and conditions, including diabetic neuropathy, obesity, schizophrenia, MS, abnormalities in pregnancy, and organ transplantation, with no or minor adverse effects. ALA seems to be also a promising agent for improving quality of life, as well as neuropathic symptoms, and even reducing the use of rescue drugs, which are commonly used by patients with diabetic neuropathy. Moreover, it has the potential to improve lipid metabolism and promote weight reduction in obese patients, besides alleviating CNS-related diseases (Schizophrenia and MS) symptoms. ALA has some positive outcomes, especially in the enhancement of walking and balance disabilities, while decreasing the levels of some proinflammatory factors related to MS progression.

Acetyl-L-Carnitine (ALC): In 3 trials of subjects diabetic peripheral neuropathy, they found that individuals treated with acetyl-L-carnitine experienced a 20.2% greater reduction in pain compared to placebo. The subjects in 3 trials of subjects with diabetic peripheral neuropathy found that individuals treated with acetyl-L-carnitine experienced a 20.2% greater reduction in pain compared to placebo. Additionally, clinical trials utilizing ALC have shown beneficial effects on nerve conduction slowing, neuropathic pain, axonal degenerative changes, and nerve fiber regeneration, despite relatively late initiation in the natural history of DPN.

Science has shown that the ingredients in Inerv8 by ChiroNutraceutical may be beneficial for:

- Reducing pain associated with neuropathy
- Reducing tingling and numbness associated with neuropathy
- Improving nerve fiber regeneration in patients with neuropathy
- Improving vibration perception in patients with neuropathy
