

Pre-installed  
in Black (A)  
GaugePilot  
connector

GaugePilot loom BROWN connects to BR1 BROWN terminal (Upper)  
 GaugePilot loom GREEN connects to BR1 BLUE terminal (Lower)  
 GaugePilot loom BLUE connects to BR1 GREEN terminal (Middle)

Upper and Lower references are for when the BR1 is oriented as shown in the image above, so that the paint blobs are to the left of the terminals

We've noticed a certain variation in the colour of the blobs indicating which terminal is which. The green can be very yellow; the brown quite violet; the blue very pale. Hence we recommend you orientate your BR1 as per the image above to determine which terminal is which and remember that blue goes to green, and green goes to blue.

## Brantz BR1 Connection

Sheet 1 of 1

30th March 2016 Revision: R2
