

8.1mm mounting hole

GP-A17 is a high quality stainless steel bodied amber 12V indicator light (LED) with 2.8mm blade terminals. Also operates at 6V.

Crimp terminals, Warning 1 and Warning Negative wires are included with the light.

IP67 rated

Light can also be connected to Warning 2 (to do so, use position 9 instead of position 8).

The Warning Negative wire is shared with Warning 1 and may already be fitted (ensure it is connected to Battery Negative).

8.1mm diameter mounting hole. 12.7mm diameter bezel.
