

Our GP-S04 sensor is physically interchangeable with the Monit PR001-EN, has a higher maximum detection frequency, and is guaranteed for 5V operation

- Operating Air Gap: 1.5mm
- Operating Temperature: -40 to +125 degrees C
- Vibration: 40Hz to 2KHz, 15g maximum sinusoidal
- Maximum detection frequency: >1000Hz
- Environmental rating: IP67

If using for wheel sensor 2 input, substitute the loom wires for the ones shown below. You will need to add these to your connector from the additional wires provided with your GaugePilot in wiring pack 4. See the resource area on www.gaugepilot.uk for how to add wires to the GaugePilot black connector

Wheel 1 Input	Wheel 2 Input	Sensor Signal	GP-S04 Sensor Wire
A10	A9	5V	Brown
A8	A6	Pulse	Black
A19	A20	Ground	Blue

Positive and Negative Earth Vehicles
