“Aromatically this wine leads with soft, velvety, brambly wild raspberry with lovely soft violet and stonefruit florals; additional detail comes from brown spice. Supple, textural brambly raspberry notes lead into a soft broad flow through the palate. Finally, the wine finishes with a herb influence running elegant structural elements.”

Matt Dicey, Winemaker

CELLARING POTENTIAL

Mt Difficulty Packspur Pinot Noir will improve for 8 -12 years given optimal cellaring conditions.

VINTAGE 2013

The growing season in 2013 kicked off with a cool spring. Frosts in early November reduced production from Station Block, at the top of the Cromwell basin, but Bannockburn was untouched. Although the cool spring continued after that, temperatures warmed just before Christmas in time to make for a very successful flowering. January was cooler and wetter than average and then February onwards was very warm and dry. We experienced a protracted veraison (the point at which the grapes stop growing and start to ripen, characterised by colour change) leading to increased variability in ripeness. To counter this we introduced a late colour thin to ensure fruit arrived in optimal condition at harvest. Early autumn returned to more classic settled Central autumnal conditions, and harvest started on the 3rd of April, continuing through until the 3rd of May. It was a normal yielding year, with nice focused acidity and interesting flavour profiles reflecting, to some degree, the variability of the season.

VINEYARDS

The Growers Series is a recent addition to the Mt Difficulty portfolio, allowing us to showcase the terroir of different subregions. Packspur Vineyard is situated on Heany Road in Lowburn, on the northern side of Cromwell (as opposed to Bannockburn to the South). The vineyard takes its name from the track that was used to pack supplies over the Pisa Range, from the Lowburn Valley to the gold-fields of the Cardrona Valley. Packspur Vineyard was planted from locally sourced cuttings by Anne and Laurie McAuley in 1993. The vineyard comprises 3 hectares of north facing Pinot Noir (clones 5, 6, 115 and Lincoln Mix), Pinot Gris, Riesling, Sauvignon Blanc and Chardonnay. The grapes are close-planted on a mottled shallow mix of Waenga and Fraser sandy loam soils. The vineyard escapes the worst of winds and the slopes typically ensure a minimal frost risk.

WINEMAKING CONSIDERATIONS

We harvested the Pinot Noir on the 3rd May; in total 2.9 Tonnes of fruit was harvested. All of the different clones were fermented together, to try and enhance early integration. The majority of the fruit was destemmed, with 20% retained as whole clusters to help build structural intensity and help reflect the unique characteristics of the site. The wine underwent a 8 day cold soak and was hand plunged once daily; this was followed by a 10 day natural fermentation with temperature peaking at 290°C during which time the ferment was plunged twice daily. The wine stayed on skins for 24 days in total prior to pressing, overnight settling and then to barrel for 16 months. The wine went through malolactic fermentation in the spring, was racked to tank the following winter and bottled, unfinned, in December.
