

"Stick It" Hybrid-Skirt

The "Stick it" Hybrid-Skirt presents a fresh look to traditional soft plastic lure presentations. This screw in style lure component is designed to be attached to the tail end of a variety of soft plastics such as stick baits, beavers and creature baits. While most commonly used on a Texas Rig, it can be added to a variety of rigs and presentations to help give the lure a unique profile. Each "Stick It" Hybrid-Skirt is individually hand tied using high quality, durable thread.

Rigging Examples:

Flipping/Punch Rig

Texas Rig

Swim Bait Rig

Rugby Style Rig
