

Covert Video Surveillance – Simplified

Surveillance used to mean the placement of UC's, rolling bucket trucks, and installing expensive cameras in fake utility cabinets. NETGEAR has changed how agencies can deploy covert video surveillance. Cameras deploy in minutes. UC's are less at risk. Video can be easily shared up and down the chain....from the task force to the DA's office.

- ★ Stream live video from anywhere to any device
- ★ Small, easy to deploy and conceal foot print
- ★ Affordable plans
- ★ IP 65 rated
- ★ Multiple power options
- ★ Nightvision
- ★ Easy to use software tools
- ★ Automatic notification
- ★ Single camera and multi camera options
