**CUSTOMIZABLE
TOOLS:**

WE HAVE A FULL PORTFOLIO OF PRODUCTS THAT CAN BE INTEGRATED TO TAILOR TREATMENTS AS THE NEEDS OF EACH CLIENT EVOLVE.

HERBAL SKIN
SOLUTIONS

Mandelic 25% Pro-Glow Peel Protocol

Prep:

- Apply Professional Prep Solution to completely clean skin with a woven 4x4. Let skin dry completely.
- Using a cotton swab, apply a small amount of Vaseline or other occlusive to the inner and outer canthus of the eye, nasal openings, and the vermillion border.

Peel:

- Apply a thin, even veil of Mandelic 25% Pro-Glow Peel to a glycolic applicator and quickly apply evenly to the area being treated, in gentle, circular motions, avoiding over the eyelids, around the ears, corners of the nose and corners of the mouth.
- Mandelic 25% Pro-Glow Peel may be left on for 1-3 minutes depending on clients comfort level and skin condition. It is suggested in their first treatment to leave on for 1 minute and working up to 2-3 minutes in following sessions.

Neutralize and Remove:

- Once you are ready to remove the peel, rinse the skin with cold water. Apply Neutralizer Solution evenly across the treated area.
**If hot spots appear, or extreme redness or stinging persists, wash the area being treated immediately and thoroughly with cold water. Pat the skin dry with cotton or tissue(no rubbing)*
- After the peel has been neutralized completely, apply pH Balance toner to restore the skin's natural pH level.

Post-Care:

- Apply the Herbal Skin Solutions Vitamin C Enhancement Serum or EGF Cellular Activator, specific to skin type.
- Apply Daily Tinted Moisturizer w/ SPF 30 before client leaves the treatment room for protection against harmful UVA/UVB rays.

Mandelic 25% Pro-Glow Peel w/ Nano-Infusion

pH 2.5

Prep:

- Apply Professional Prep Solution to completely clean skin with a woven 4x4. Let skin dry completely.
- Using a cotton swab, apply a small amount of Vaseline or other occlusive to the inner and outer canthus of the eye, nasal openings, and the vermillion border.

Peel:

- Apply a thin, even veil of Mandelic 25% Pro-Glow Peel to a glycolic applicator and quickly apply evenly to the area being treated, in gentle, circular motions, avoiding over the eyelids, around the ears, corners of the nose and corners of the mouth.
- Mandelic 25% Pro-Glow Peel may be left on for 1-3 minutes depending on clients comfort level and skin condition. It is suggested in their first treatment to leave on for 1 minute and working up to 2-3 minutes in following sessions.

Nano-Therapy:

- Set CIT Pen to 0.25mm before inserting your cartridge. Choose Nano Silicone or Nano Surgical Steel disposable cartridge, depending on client's desired results. Place your protective sleeve over your device. To power your device on, hold the power button down for 2-3 seconds until you feel your device power up. Press power button once to change through the various speed settings.
- Grip the CIT Pen lightly, as you would glide a pen. Holding skin taut, place the pen on the skin working in cross hatch or small circular motions on desired depth. The skin may still be wet from the peel application, use this as your glide. Nano-Infusion will work by penetrating the peel into the stratum corneum to allow for actives to work more effectively. Work 1-3 passes, within the 1-3 minute time frame as listed above, checking in with the client often to ensure they are comfortable.

Neutralize and Remove:

- Once you are ready to remove the peel, rinse the skin with cold water. Apply Neutralizer Solution evenly across the treated area.
**If hot spots appear, or extreme redness or stinging persists, wash the area being treated immediately and thoroughly with cold water. Pat the skin dry with cotton or tissue(no rubbing)*
- After the peel has been neutralized completely, apply pH Balance toner to restore the skin's natural pH level.

Post-Care:

- Apply the Herbal Skin Solutions Vitamin C Enhancement Serum or EGF Cellular Activator, specific to skin type.
- Apply Daily Tinted Moisturizer w/ SPF 30 before client leaves the treatment room for protection against harmful UVA/UVB rays.

Pro-Glow Peel 55% Protocol

pH 2.2

Prep:

- Apply Professional Prep Solution to completely clean skin with a woven 4x4. Let skin dry completely.
- Using a cotton swab, apply a small amount of Vaseline or other occlusive to the inner and outer canthus of the eye, nasal openings, and the vermillion border.

Peel:

- Apply a thin, even veil of Pro-Glow Peel 55% to a glycolic applicator and quickly apply evenly to the area being treated, in gentle, circular motions, avoiding over the eyelids, around the ears, corners of the nose and corners of the mouth.
- Pro-Glow Peel 55% may be left on for 1-3 minutes depending on client's comfort level and skin condition. It is suggested in their first treatment to leave on for 1 minute and working up to 2-3 minutes in following sessions.

Neutralize and Remove:

- Once you are ready to remove the peel, rinse the skin with cold water. Apply Neutralizer Solution evenly across the treated area.
**If hot spots appear, or extreme redness or stinging persists, wash the area being treated immediately and thoroughly with cold water. Pat the skin dry with cotton or tissue(no rubbing)*
- After the peel has been neutralized completely, apply pH Balance toner to restore the skin's natural pH level.

Post-Care:

- Apply the Herbal Skin Solutions Vitamin C Enhancement Serum or EGF Cellular Activator, specific to skin type.
- Apply Daily Tinted Moisturizer w/ SPF 30 before client leaves the treatment room for protection against harmful UVA/UVB rays.
