October 12th, 2016

“We were given the opportunity to review the OMI (Oxford Medical Instruments) PEMF Therapy products and have found them to be an effective and affordable PEMF Therapy solution for both professionals and home use.

Having many years of experience with PEMF Therapy in addition to having completed multiple private sector research grants led to writing a book on the subject to address some the questions about this advanced technology for the public. We have utilized the OMI products in our clinical practice and many of our patients have and are reporting positive results.

The OMI PEMF Therapy devices has exceptional signaling with appropriate field strength .:

Sincerely,

Cris Angel, DA, EAMP, HDD  
Medical Director
