
ATTENTION

Installation of units fitted with a pump out drain.

This unit has been fitted with a pump out drain, designed for use where floor level drainage is not available. Please note the following points should be followed when installing the machine in addition to the steps already in the manual.

- The machine has been supplied with a 2 metre long flexible drain hose, It should be cut if it is too long, **do not coil the hose**.
- The drain hose can travel up vertically or at an angle for 1 metre.
- The drain hose can be extended up to 4 metres horizontally but with fall to the drain.
- The drain hose shouldn't have any kinks or undulations, the water in the drain has to be able to flow as smoothly as possible.
