

For the aunt who's sensitive to synthetic fragrances...

Koala Eco Natural Hand Wash (\$25)

Credit: Koala Eco

This **plant-based hand wash** (\$25) owes its divine, uplifting scent to Australian essential oils like rosemary and eucalyptus—which also happen to be among nature's most effective antiseptics. Plus, the founders behind Koala Eco (which also makes excellent multi-purpose cleansers and dish soaps) ensure their products work even better than chemically based formulations—all without using harmful ingredients like perfumes, dyes, and allergens. Each recyclable bottle is made with 100% post-consumer recycled materials, so no new plastic is created. Talk about a win-win!
