

DLC Detector

The DLC Detector checks the OBD port power supply (+12V and ground connection).

- **USER FRIENDLY**
- **PORTABLE**
- **CAN BE USED ON ALL MAKES**
- **BULB INDICATORS**
- **POWER CHECK**
- **GROUND/EARTH CHECK**
- **PIN 7 CHECK**
- **SAVES TIME AND MONEY**

MANUAL:

Plug DLC Detector tool in OBD-2 diagnostic connector of the car.

*If the green LED lights and red LED OFF wires condition is OK.
You can connect any automotive diagnostic equipment and work ahead.*

If the red LED lights and green LED OFF – don't connect any automotive diagnostic equipment! You can damage it! Check power supply and GND in OBD-2 connector of this car. After fixing check it by DLC Detector once again.
