# COBRA-D UNIFORM RAPPEL BELT

Designed for Emergency Rappel

UL CLASSIFIED to NFPA 1983 - Escape Belt

In a class by itself, CMC Rescue offers the only NFPA Certified Uniform Rappel Belt available. Designed for everyday wear but with the performance needed for an emergency rappel or belay. Standard uniform wear for fire fighters, search and rescue, and SWAT personnel, the belt is constructed to the same exacting standards as our harness line and is the only certified uniform belt available. The belt uses 1-3/4" web that fastens securely without requiring any hook-and-loop material. The AstriAlpin D-ring COBRA® buckle is manufactured from 7075 aluminum alloy and features a built-in stainless steel D-ring (Buckle:18kN / 4,000 lb MBS, D-ring: 22kN / 5,000 lb MBS, straight pull). The buckle requires a two finger release and will not open when loaded. Included web keeper secures excess web at tail end of belt. Adjustable, one size fits most.

**Note:** This belt is not intended as a substitute for a harness.

**D-RING**  
opens away  
from buckle  
for quick, easy  
connection
