USE

The CMC Rescue Radio Vest holds two radios in a balanced, weight distributing, easy-to-don design. Adjust the web through the buckles at the front and sides for best fit and comfort. The hook-and-loop strap at the upper back can be adjusted to provide the most comfort of the shoulder strap position.

To adjust the radio pocket for proper fit to the body of your radio, insert the included tongue depressor (or other flat surface) in between the 3/4" bottom strap and 1-1/2" backing web to separate the hook and loop surfaces. Adjust for the proper fit to the radio with the plastic buckle just above the top edge of the pocket. Remove the tongue depressor and check to make sure the bottom strap is secure.

Use the flat pockets on the inside of the vest panels to store pens and a notepad.

MAINTENANCE

If the equipment becomes soiled, it can be washed in cold water with mild detergent. CMC recommends the use of LifeLine cleaner. Dry out of direct sunlight. Do not dry in an automatic dryer.

REPAIR

All repair work shall be performed by the manufacturer. All other work or modifications may void the warranty and releases CMC Rescue, Inc. from all liability and responsibility as the manufacturer.
