

**Desktop Slurry Mixing Machine  
EQ-DTSM - 110/220**

EQ-DTSM is a compact desktop slurry mixing machine designed for processing small quantities of cathode and anode slurries for lithium ion batteries. Slurry is prepared by mixing appropriate ratio of anode or cathode materials with binder and conductive materials under vacuum for a specified period of time. In addition, the bottom vibrating plate helps remove the air bubbles before the vacuum mixing process starts. EQ-DTSM is specifically designed for lithium ion battery materials. Ideal for sample size less than 500 ml. Solid stainless blade gives thorough mixing and transparent jar allows you to visually monitor the mixing.
