

**Desktop Ball Milling Machine
EQ-BMDT - 110/220**

EQ-BMDT is a compact desk top ball milling machine for small samples of lithium ion battery anode and cathode materials. This unit is made with solid steel and designed robustly. This can be used to reduce the particle size of various materials to required diameter. This semi automatic machine can be programmed for various times to get good control over the processing. The cover can be closed during operation and provides safe clean operation. This unit comes with steel jar and balls. Optional additional jars can be purchased for different materials.

Part No:	: EQ-BMDT-110/EQ-BDT-220
Description	: Desktop Ball Milling Machine
Operating Voltage	: 110V /220V
Maximum Power	: 300 watts
Timer Range	: 0-120 minutes
Rotation frequency	: 1200 RPM
Dimension	: (405 x 365 x 260)mm
Weight	: 40kg (88 lbs)
Recommended sample size	: 20 ml or less
Packing	: Wooden Crate
Included	: Power cord, 50ml steel jar, steel balls 8 pieces
Feeding granularity	: < 1 mm recommended
Dischage Granularity	: 0.1 micron
