

877-3493941

EM-CCGM- is a compact desktop Grooving machine for standard cylindrical cell types CR123, 18650 26650, 32650, AA, AAA. Solid robust construction. Easy to operate. Available for 110 or 220V single phase. Little learning time. Compressed air supply is needed to operate. Groove depth, grooving speed, width are all adjustable. Comes with standard one year warranty on parts and labor. One standard die for a cell size is supplied. Dies for additional cell sizes may be purchased separately. 100 sets of cell cases supplied with this machine.

Part No:	: EM-CCGM-110 / EM-CCGM-220
Description	: Cylindrical Cell Grooving Machine
Operating Voltage	: 110V /220V
Rated Power	: 140 W
Air Pressure required	: > 5 MPa
Grooving accuracy	: +/- 0.1mm
Grooving Dimension	: Depth: 1.2-2.0 mm, Width: 1.1 - 1.5 mm
Blade Durability	: > 1 million times
Grooving rate	: > 400 per hour (when trained)
Dimension	: (500 x 400 x 350)
Weight	: 70 kgs(158 Lbs)
Warranty	: One year
Packing	: Wooden Crate
Included	: Power cord, mold for one size cell, appropriate hoses for connecting with air compressor, foot pedal for convenient operation.
