

**Pouch Cell Heat Sealing
Machine for the Sides**

PC-HS is a semi automatic pouch cell heat sealing machine for sealing the sides of the cell. Usually the bottom of the cell is sealed by folding the cell cup and the two vertical sides are heat sealed. PC-HS comes with adjustable temperature settings for the top and bottom and also with timer. Each cell is manually set and sealing action is done with the foot pedal. Air compressor need to be connected with a pressure of about 0.7 Mpa. Temperature and timer settings varies depends upon the thickness of the Aluminum foils.

Part No:	: PC-HS-110/PC-HS-220
Description	: Pouch Cell Heat Sealing Machine for the sides
Operating Voltage	: 110V /220V
Maximum Power	: 900 watts
Dimensions	: 320mm(L) x 320mm(W) x 485mm(H)
Air Pressure Requirement	: 0.4 - 0.7 Mpa
Sealing Cell Length	: 190 mm maximum
Weight	: 32kg (70 lbs)
Seal width	: 3.2 mm
Sealing temperature	: 50 - 300 C
Timer	: 0-99 Sec adjustable
Packing	: Wooden Crate
Included	: Power cord, foot pedal, Air tube for compressor
