

Easter Preschool Pack

Skill: Visual Discrimination

Sorting by Size

Cut out the cards. Sort into three columns by size. You may want to use felt mats instead of columns. Two sets of labels are provided: Large-Medium-Small, Big-Medium-Little

Shadow Matching

This is a simple matching activity. I like to use these to emphasize the layout procedure, focusing on left to right and top to bottom formatting. Separate into two sets. You may want to place a color-coding dot on the back so the children can put them back into the separate sets once they are done. Place one set of cards in a line along the top of a rug or table, starting from the left. Pick up a random card from the other set and place below the first card on the rug. Does it match? If yes, leave it there. If not, slide it to the right, below the next card. Does it match? Continue on. The process of lining up the cards and sliding from left to right helps prepare the child for later reading activities.

Comprehension: Following Directions

This is fun to play with a small group of children to help with comprehension and following a sequence of steps. This set has three levels of difficulty- ranging from 1-step directions to 3-step directions.

Vocabulary and Inferencing: The Question Game

Cut out the cards. Distribute the pictures among a small group of children. Name each picture and talk about it together. Draw a question card and let the children use the clues to identify the correct picture. Encourage children to create their own questions/riddles based on what they know and what they can see in the picture.

Category Sorting

Cut apart the image cards. Sort onto the correct mats.

Prepositions (Where is it?)

Line up the picture cards along the bottom of the rug or table, or distribute among a group of students. Read one of the labels. Child finds the correct picture card to go with the label. Put picture and label at the top of the rug or table.

Extension: Make an emergent reader booklet with the provided blacklines.

Skill: Number Sense

0-10 Number Cards

These 0-10 number cards can be used for a variety of counting activities. Blank cards have also been provided if you would like to make your own cards. These are great for calendar numbers too! Instructions for the Montessori Numbers and Counters Activity can be found here: <http://youtu.be/qvFuUwvFf9Y>

Counting Clip Cards

Cut out the cards. Use clothespins to clip the correct number. You may want to make this a write-and-wipe activity and have the child circle the correct number with a dry-erase or washable marker. The numbers printed on each card are consecutive numbers for the most part to provide a little bit of challenge. Place a color-coding dot on the back, just behind the correct number, for self checking. Alternatively, adjust your printer settings and print out a miniature copy of this set to make control cards. Circle the correct number on your control cards before laminating.
